f. RETIREMENT AND PENSION DEDUCTIONS .....	71
3. MONTHLY EXPENDITURES (MTAB) FILE .....	73
4. INCOME (ITAB) FILE.....	75
5. DETAILED EXPENDITURES (EXPN) FILES .....	77
a. GENERAL SURVEY INFORMATION – MAJOR HOUSEHOLD APPLIANCES (SECTION 1, PART C) (APL).....	77
b. RENTED LIVING QUARTERS – CU TENURE, RENTAL PAYMENTS, FACILITIES, AND SERVICES FOR SAMPLE UNIT AND OTHER UNITS (SECTION 2, PARTS A & B) (RNT).....	79
c. OWNED LIVING QUARTERS AND OTHER OWNED REAL ESTATE - DETAILED PROPERTY DESCRIPTION (SECTION 3, PART B) (OPB) .....	82
d. OWNED LIVING QUARTERS AND OTHER OWNED REAL ESTATE - DISPOSED OF PROPERTY (SECTION 3, PART D) (OPD) .....	84
e. OWNED LIVING QUARTERS AND OTHER OWNED REAL ESTATE - MORTGAGES (SECTION 3, PART F) (MOR) .....	86
f. OWNED LIVING QUARTERS AND OTHER OWNED REAL ESTATE - LUMP SUM HOME EQUITY LOANS (SECTION 3, PART G) (HEL) .....	90
g. OWNED LIVING QUARTERS AND OTHER OWNED REAL ESTATE - LINE OF CREDIT HOME EQUITY LOANS (SECTION 3, PART H) (OPH).....	94
h. OWNED LIVING QUARTERS AND OTHER OWNED REAL ESTATE - OWNERSHIP COSTS (SECTION 3, PART I) (OPI) .....	96
i. UTILITIES AND FUELS FOR OWNED AND RENTED PROPERTIES - TELEPHONE EXPENSES (SECTION 4, PART A) (UTA).....	104

j. UTILITIES AND FUEL FOR OWNED AND RENTED PROPERTIES - SCREENING QUESTIONS (SECTION 4, PART B) (UTB).....	105
k. UTILITIES AND FUELS FOR OWNED AND RENTED PROPERTIES - DETAILED QUESTIONS (SECTION 4, PART C) (UTC) .....	106
l. CONSTRUCTION, REPAIRS, ALTERATIONS, AND MAINTENANCE OF PROPERTY - SCREENING QUESTIONS (SECTION 5, PART A) (CRA).....	109
m. CONSTRUCTION, REPAIRS, ALTERATIONS, AND MAINTENANCE OF PROPERTY - JOB DESCRIPTION (SECTION 5, PART B) (CRB).....	110
n. APPLIANCES, HOUSEHOLD EQUIPMENT, AND OTHER SELECTED ITEMS - PURCHASE OF HOUSEHOLD APPLIANCES (SECTION 6, PART A) (APA).....	116
o. APPLIANCES, HOUSEHOLD EQUIPMENT, AND OTHER SELECTED ITEMS - PURCHASE OF HOUSEHOLD APPLIANCES AND OTHER SELECTED ITEMS (SECTION 6, PART B) (APB) .....	117
p. HOUSEHOLD EQUIPMENT REPAIRS, SERVICE CONTRACTS, AND FURNITURE REPAIR AND REUPHOLSTERING - HOUSEHOLD EQUIPMENT REPAIRS AND SERVICE CONTRACTS (SECTION 7, PART B) (EQB).....	120
q. HOUSEHOLD EQUIPMENT REPAIRS, SERVICE CONTRACTS, AND FURNITURE REPAIR AND REUPHOLSTERING - FURNITURE REPAIR OR REUPHOLSTERING (SECTION 7, PART D) (EQD).....	121
r. HOME FURNISHINGS AND RELATED HOUSEHOLD ITEMS - PURCHASES (SECTION 8, PART A) (FRA) .....	121
s. HOME FURNISHINGS AND RELATED HOUSEHOLD ITEMS - RENTAL OR LEASING OF FURNITURE (SECTION 8, PART B) (FRB) .....	123
t. CLOTHING AND SEWING MATERIALS - CLOTHING (SECTION 9, PART A) (CLA) .....	123
u. CLOTHING AND SEWING MATERIALS - INFANTS CLOTHING, WATCHES, JEWELRY AND HAIRPIECES (SECTION 9, PART B) (CLB).....	125
v. CLOTHING AND SEWING MATERIALS - SEWING MATERIALS (SECTION 9, PART C) (CLC) .....	126
w. CLOTHING AND SEWING MATERIALS - CLOTHING SERVICES (SECTION 9, PART D) (CLD) .....	127
x. RENTED AND LEASED VEHICLES - SCREENING QUESTIONS (SECTION 10, PART A.1) (RTV) .....	128
y. RENTED AND LEASED VEHICLES - DETAILED QUESTIONS FOR LEASED VEHICLES (SECTION 10, PART B) (LSD) .....	129
z. OWNED VEHICLES - DETAILED QUESTIONS (SECTION 11, PART B) (OVb).....	134
aa. OWNED VEHICLES - DISPOSAL OF VEHICLES (SECTION 11, PART C) (OVC).....	143
bb. VEHICLE OPERATING EXPENSES - VEHICLE MAINTENANCE AND REPAIR, PARTS, AND EQUIPMENT (SECTION 12, PART A) (VEQ).....	145
cc. VEHICLE OPERATING EXPENSES - LICENSING, REGISTRATION, AND INSPECTION OF VEHICLES (SECTION 12, PART B) (VLR) .....	147
dd. VEHICLE OPERATING EXPENSES - OTHER VEHICLE OPERATING EXPENSES (SECTION 12, PART C) (VOT).....	147
ee. INSURANCE OTHER THAN HEALTH - DETAILED QUESTIONS (SECTION 13, PART B) (INB) .....	149
ff. HOSPITALIZATION AND HEALTH INSURANCE - DETAILED QUESTIONS (SECTION 14, PART B) (IHB).....	152
gg. HOSPITALIZATION AND HEALTH INSURANCE - MEDICARE, MEDICAID, AND OTHER HEALTH INSURANCE PLANS NOT DIRECTLY PAID FOR BY THE CU (SECTION 14, PART C) (IHC).....	155
hh. MEDICAL AND HEALTH EXPENDITURES - PAYMENTS FOR MEDICAL EXPENSES (SECTION 15, PART B) (MDB) .....	159
ii. MEDICAL AND HEALTH EXPENDITURES - REIMBURSEMENTS FOR MEDICAL EXPENSES (SECTION 15, PART D) (MDC) .....	160
jj. EDUCATIONAL EXPENSES (SECTION 16) (EDA) .....	161
kk. SUBSCRIPTIONS, MEMBERSHIPS, BOOKS AND ENTERTAINMENT EXPENSES - SUBSCRIPTIONS AND MEMBERSHIPS (SECTION 17, PART A) (SUB).....	163

II. SUBSCRIPTIONS, MEMBERSHIPS, BOOKS, AND ENTERTAINMENT EXPENSES -	
BOOKS AND ENTERTAINMENT EXPENSES (SECTION 17, PART B) (ENT).....	164
mm. TRIPS AND VACATIONS - TRIPS PAID ENTIRELY BY CU AND PARTIALLY	
REIMBURSED TRIPS (SECTION 18, PART C) (TRV) .....	166
nn. TRIPS AND VACATIONS - 100% REIMBURSED TRIPS (SECTION 18, PART D) (TRD) .....	173
oo. TRIPS AND VACATIONS - TRIP EXPENSES FOR NON-CU MEMBERS (SECTION 18,	
PART E) (TRE) .....	174
pp. TRIPS AND VACATIONS - LOCAL OVERNIGHT STAYS (SECTION 18, PART F) (TRF) .....	175
qq. MISCELLANEOUS EXPENSES (SECTION 19) (MIS).....	177
rr. EXPENSE PATTERNS FOR FOOD, BEVERAGES, AND OTHER SELECTED ITEMS -	
FOOD AND BEVERAGES (SECTION 20, PART A) (XPA) .....	178
ss. EXPENSE PATTERNS FOR FOOD, BEVERAGES, AND OTHER SELECTED ITEMS -	
SELECTED SERVICES AND GOODS (SECTION 20, PART B) (XPB).....	180
tt. CREDIT LIABILITY - CREDIT BALANCES - SECOND QUARTER ONLY (SECTION 21,	
PART A.1) (FN2).....	182
uu. CREDIT LIABILITY - CREDIT BALANCES - ANNUAL SUPPLEMENT - FIFTH	
QUARTER ONLY (SECTION 21, PART A.2) (FNA).....	183
vv. CREDIT LIABILITY - FINANCE CHARGES - ANNUAL SUPPLEMENT - FIFTH	
QUARTER ONLY (SECTION 21, PART B) (FNB) .....	184

XVII. INQUIRIES, SUGGESTIONS, AND COMMENTS .....	265

## I. INTRODUCTION

The Consumer Expenditure Survey (CE) program provides a continuous and comprehensive flow of data on the buying habits of American consumers. These data are used widely in economic research and analysis, and in support of revisions of the Consumer Price Index. To meet the needs of users, the Bureau of Labor Statistics (BLS) produces population estimates (for consumer units or CUs) of average expenditures in news releases, reports, bulletins, articles in the Monthly Labor Review, and on diskettes. Tabulated CE data are also available on the Internet and by facsimile transmission (See Section XVI. APPENDIX 5). The microdata are available on compact disk-ROM (CD-ROM).

These microdata files present detailed expenditure and income data from the Interview component of the CE for 1997 and the first quarter of 1998. The Interview survey collects data on up to 95 percent of total household expenditures. The 1997 microdata include files created directly from the expenditure sections of the Interview survey (EXPN files). This is the fourth release in which the Interview and EXPN public use files are offered together as one product. Formerly a separate product, the EXPN files contain expenditure data and ancillary descriptive information, often not available on the MTAB files, in a format similar to the Interview questionnaire. In addition to the extra information available on the EXPN files, users can identify distinct spending categories easily and reduce processing time due to the organization of the files by type of expenditure.

Estimates of average expenditures in 1997 from the Interview survey, integrated with data from the Diary survey, are published in *Consumer Expenditures in 1997 Report 927* (1999). A list of recent publications containing data from the CE appears at the end of this documentation.

The microdata files are in the public domain and, with appropriate credit, may be reproduced without permission. A suggested citation is: "U.S. Department of Labor, Bureau of Labor Statistics, Consumer Expenditure Survey, Interview Survey, 1997."

## II. CHANGES FROM THE 1996 MICRODATA FILES

1. The PUBFLAG values changed for the following UCCs on the ITAB files starting in Q971.

<u>UCC</u>	<u>New PUBFLAG values</u>
980330	1
980350	2
980360	2

The UCC 980330 has been deleted from the AGG file and will no longer appear in the output of the sample program, while UCCs 980350 and 980360 have been added to the AGG file and will appear in the sample program output.

2. The name of the variable ACCESS has been changed to DIRACC starting in Q981. The flag variable has also been changed from ACCESS\_ to DIRACC\_

### III. FILE INFORMATION

Since the 1996 release, the CD-ROM has provided the microdata as SAS data sets or ASCII files. (1996 also marked the year for which microdata were no longer available on magnetic tape.)

The 1997 Interview release contains four groups of Interview data files (FMLY, MEMB, MTAB, and ITAB), 48 EXPN files, and five processing files. The FMLY, MEMB, MTAB, and ITAB files are organized by the calendar quarter of the year in which the data were collected. (See Section V.A.1.b. CALENDAR PERIOD VERSUS COLLECTION PERIOD for a description of calendar and collection years.) There are five quarterly data sets for each of these files, running from the first quarter of 1997 through the first quarter of 1998. The FMLY files contain CU characteristics, income, and summary level expenditures; the MEMB files contain member characteristics and income data; the MTAB files contain expenditures organized on a monthly basis at the UCC level; and the ITAB files contain income data converted to a monthly time frame and assigned to UCCs. Each of the 48 EXPN files contains five quarters of data. The EXPN files contain data directly derived from their respective questionnaire sections.

The five processing files enhance computer processing and tabulation of data, and provide descriptive information on item codes. The five processing files are: a sample table aggregation file (AGGI), a sample table label file (LABELI), a Universal Classification Codes file (UCCI), a vehicle make and model file (VEHI), and a file (SAMPLI) containing the sample program (See Section VII. A. SAMPLE PROGRAM). The processing files are further explained in Section III.F.6. PROCESSING FILES.

An Adobe Acrobat PDF version of this documentation can be found in the *X:\Document* folder of this CD-ROM. The PDF file is named *Intdoc97.pdf*. Adobe Acrobat Reader is required to read and print this file. The reader is provided in the *X:\Acroread* folder of the CD-ROM and can be loaded onto your system by following the guidelines in the *Readme.1st* file found in the root directory. Adobe Acrobat Reader is a shareware product.

Since space in this documentation prohibits the explanation of all information in the EXPN files, we strongly suggest the user refer to the questionnaire. A list of the 48 EXPN file names and the sections of the questionnaire to which they relate follows.

APL Section 1, Part C	General Survey Information - Major Household Appliances
RNT Section 2, Parts A and B	Rented Living Quarters – CU Tenure, Rental Payments, Facilities, and Services for Sample Unit and Other Units
OPB Section 3, Part B	Owned Living Quarters and Other Owned Real Estate - Detailed Property Description
OPD Section 3, Part D	Owned Living Quarters and Other Owned Real Estate - Disposed of Property
MOR Section 3, Part F	Owned Living Quarters and Other Owned Real Estate - Mortgages
HEL Section 3, Part G	Owned Living Quarters and Other Owned Real Estate - Lump Sum Home Equity Loans
OPH Section 3, Part H	Owned Living Quarters and Other Owned Real Estate - Line of Credit Home Equity Loans
OPI Section 3, Part I	Owned Living Quarters and Other Owned Real Estate – Ownership Costs
UTA Section 4, Part A	Utilities and Fuels for Owned and Rented Properties - Telephone Expenses
UTB Section 4, Part B	Utilities and Fuels for Owned and Rented Properties - Screening Questions

UTC Section 4, Part C	Utilities and Fuels for Owned and Rented Properties - Detailed Questions
CRA Section 5, Part A	Construction, Repairs, Alterations, and Maintenance of Owned and Rented Property - Screening Questions
CRB Section 5, Part B	Construction, Repairs, Alterations, and Maintenance of Owned and Rented Property - Job Description
APA Section 6, Part A	Appliances, Household Equipment, and Other Selected Items – Purchase of Household Appliances
APB Section 6, Part B	Appliances, Household Equipment and Other Selected Items – Purchase of Household Appliances and Other Selected Items
EQB Section 7, Part B	Household Equipment Repairs, Service Contracts, and Furniture Repair and Reupholstering - Household Equipment Repairs and Service Contracts
EQD Section 7, Part D	Household Equipment Repairs, Service Contracts, and Furniture Repair and Reupholstering - Furniture Repair or Reupholstering
FRA Section 8, Part A	Home Furnishings and Related Household Items – Purchases
FRB Section 8, Part B	Home Furnishings and Related Household Items - Rental or Leasing of Furniture
CLA Section 9, Part A	Clothing and Sewing Materials – Clothing
CLB Section 9, Part B	Clothing and Sewing Materials - Infants Clothing, Watches, Jewelry, and Hairpieces
CLC Section 9, Part C	Clothing and Sewing Materials - Sewing Materials
CLD Section 9, Part D	Clothing and Sewing Materials - Clothing Services
RTV Section 10, Part A.1	Rented and Leased Vehicles - Screening Questions
LSD Section 10, Part B	Rented and Leased Vehicles - Detailed Questions for Leased Vehicles
OVB Section 11, Part B	Owned Vehicles - Detailed Questions
OVC Section 11, Part C	Owned Vehicles - Disposed of Vehicles
VEQ Section 12, Part A	Vehicle Operating Expenses - Vehicle Maintenance and Repair, Parts, and Equipment
VLR Section 12, Part B	Vehicle Operating Expenses - Licensing, Registration, and Inspection of Vehicles
VOT Section 12, Part C	Vehicle Operating Expenses - Other Vehicle Operating Expenses
INB Section 13, Part B	Insurance Other Than Health - Detailed Questions
IHB Section 14, Part B	Hospitalization and Health Insurance - Detailed Questions
IHC Section 14, Part C	Hospitalization and Health Insurance - Medicare, Medicaid and Other Health

## Insurance Plans Not Directly Paid For By The CU

MDB Section 15, Part B	Medical and Health Expenditures - Payments For Medical Expenses
MDC Section 15, Part C	Medical and Health Expenditures - Reimbursements For Medical Expenses
EDA Section 16	Educational Expenses
SUB Section 17, Part A	Subscriptions, Memberships, Books, and Entertainment Expenses - Subscriptions and Memberships
ENT Section 17, Part B	Subscriptions, Memberships, Books, and Entertainment Expenses - Books and Entertainment Expenses
TRV Section 18, Parts B and C	Trips and Vacations - Trips Paid Entirely by CU and Partially Reimbursed Trips
TRD Section 18, Part D	Trips and Vacations - 100% Reimbursed Trips
TRE Section 18, Part E	Trips and Vacations - Trip Expenses for Non-CU Members
TRF Section 18, Part F	Trips and Vacations - Local Overnight Stays
MIS Section 19	Miscellaneous Expenses
XPA Section 20, Part A	Expense Patterns For Food, Beverages, and Other Selected Items – Food and Beverages
XPB Section 20, Part B	Expense Patterns For Food, Beverages, and Other Selected Items – Selected Services and Goods
FN2 Section 21, Part A.1	Credit Liability – Credit Balances – Second Quarter Only
FNA Section 21, Part A.2	Credit Liability – Credit Balances – Fifth Quarter Only
FNB Section 21, Part B	Credit Liability – Finance Charges – Fifth Quarter Only

Note that the variable NEWID, the CU's identification number, is the common variable among files by which matching is done.

## A. DATA SET NAMES

The ASCII data set names are as follows.  
("X" references the designated drive letter for your CD.)

X:\INTRVW97\FMLYI971x.TXT (Interview FMLY file for first quarter, 1997)  
X:\INTRVW97\MEMBI971x.TXT (Interview MEMB file for first quarter, 1997)

## C. DATA FLAGS

Data fields on the FMLY, MEMB, and EXPN files are explained by flag variables following the data field. The names of the flag variables are derived from the names of the data fields they reference. In general the rule is to add an underscore to the last position of the data field name, for example, SALARYX becomes SALARYX\_. However, if the data field name is eight characters in length, then the fifth position is replaced with an underscore; thus WELFAREX becomes WELF\_REX. If the fifth position is already an underscore, then the fifth position is changed to a zero, so that EDUC\_REF becomes EDUC0REF.

The flag values are defined as follows:

A flag value of "A" indicates a valid blank; that is, a blank field where a response is not anticipated.

A flag value of "B" indicates a blank resulting from an invalid nonresponse; that is, a nonresponse that is not consistent with other data reported by the CU.

A flag value of "C" refers to a blank resulting from a "don't know", refusal, or other type of nonresponse.

A flag value of "D" indicates that the data field contains a valid or good data value.

A flag value of "T" indicates topcoding has been applied to the data field.

A flag value of "H" identifies an expenditure that has been allocated to other records with the original expenditure being overwritten with a blank. (EXPN records only).

A flag value of "R" for recode has been created for the variable STATE\_. Some Primary Sampling Units (PSUs) in some states are given "false" STATE codes for nondisclosure reasons. CUs with STATE\_='R' (for recode) indicate that not all CUs with that particular STATE code are from that state. See Section IV.A. CU CHARACTERISTICS AND INCOME FILE (FMLY) on topcoding of CU characteristics and income for more detail.

## D. FILE NOTATION

Every record from each data file includes the variable NEWID, the CU's unique identification number, which is used to link records of one CU from several files across all quarters in which they participate.

Data fields for variables on the microdata files have either numeric or character values. The format column in the detailed variable descriptions (Section III.F. DETAILED VARIABLE DESCRIPTIONS) distinguishes whether a variable is numeric (NUM) or character (CHAR) and shows the number of field positions the variable occupies. Variables that include decimal points are formatted as NUM(t,r) where t is the total number of positions occupied, and r is the number of places to the right of the decimal.

In addition to format, these detailed listings give an item description, questionnaire source, identification of codes where applicable, and start position for each variable. The questionnaire source, which identifies where the data for that variable is collected on the questionnaire, is listed beneath the variable description and is formatted "S03B 2b", which denotes Section 3, Part B, Question 2b of the questionnaire.

A star (\*) is shown in front of new variables, those which have changed in format or definition, and those which have been deleted. Variables whose format has expanded are moved to the end of the files, and their original positions are left blank. New variables are added to the end of the files after variables whose format has changed. The positions of deleted variables are left blank.

Some variables require special notation. The following notation is used throughout the documentation for all files:

\*D(Yxxq) identifies a variable that is deleted as of the quarterly file indicated. The year and quarter are identified by the 'xx' and 'q' respectively. For example, the notation \*D(Y973) indicates the variable is deleted starting with the data file of the third quarter of 1997.

\*N(Yxxq) identifies a variable that is added as of the quarterly file indicated. The year and quarter are identified by the 'xx' and 'q' for new variables in the same way as for deleted variables.

\*L indicates that the variable can contain negative values.

## E. ALLOCATION AND RECORD ORIGIN (EXPANDED)

Expenditures on the EXPN files that have been allocated can be identified through their flag variable, which will have a value, set to 'H' (see Section III.C. DATA FLAGS). These expenditures can be recreated using the fields SEQNO and ALCNO. SEQNO is a counter assigned to make records unique. ALCNO is zero for all original expenditure records. If ALCNO is greater than zero, the corresponding expenditure record is the result of allocation of an original record whose expenditure field has been replaced with a blank for that CU. By summing expenditures for records with ALCNO greater than zero and the same SEQNO as the original record, one can arrive at the value which was allocated.

The codes for the variable REC\_ORIG, which are common to every EXPN file record, can be interpreted as follows:

## CODED

- 1 Data reported in the current quarter's interview.
- 2 Data reported in the previous quarter's interview that are encompassed by the current reference period. These data are brought forward through the reference period adjustment process.
- 3 Data reported in the previous quarter's interview that are encompassed by the current reference period, and this logical record duplicates a logical record from the current interview month. These data are brought forward through the reference period adjustment process; the data duplication is also identified during this process.
- 4 Inventory data reported in previous quarters' interviews brought forward through the inventory update process. No updates are applied to this logical record as none are indicated in the current inventory chart.
- 5 Inventory data reported in previous quarters' interviews brought forward through the inventory update process. Updates are applied based upon data contained in the current inventory chart.
- 6 Data created by the processing system.

## F. DETAILED VARIABLE DESCRIPTIONS

### 1. **CONSUMER UNIT (CU) CHARACTERISTICS AND INCOME FILE (FMLY)**

The "FMLY" file, also referred to as the "Consumer Unit Characteristics and Income" file, contains CU characteristics, CU income, and characteristics and earnings of the reference person and of the spouse. The file includes weights needed to calculate population estimates and variances. (See Sections V. ESTIMATION PROCEDURES and VI. RELIABILITY STATEMENT.)

Summary expenditure variables in this file can be combined to derive quarterly estimates for broad consumption categories. Demographic characteristics, such as family size, refer to the CU status on the date of the interview. Demographic characteristic information may change between interviews if, for example, a member enters or leaves the CU. Income variables contain annual values. Income data are collected in the second and fifth interviews only and cover the 12 months prior to the date of interview. Income data collected in the second interview are copied to the third and fourth interviews. Income data are updated only if a CU member over 13 is new to the CU or has not worked in previous interviews and has now started working. When there is a valid nonresponse, or where nonresponse occurs and there is no imputation, there will be missing values. The type of nonresponse is explained by associated data flag variables described in Section III.C. DATA FLAGS.

**a. CU AND INTERVIEW IDENTIFIERS**

<b>VARIABLE</b>	<b>ITEM DESCRIPTION</b>	<b>START POSITION</b>	<b>FORMAT</b>
NEWID	CU identification number. Digits 1-7 (CU sequence number, 0000001 through 9999999) uniquely identify the CU. Digit 8 is the interview number, 2 through 5.  It is possible for a CU to skip an interview. For example, a CU could have a 2nd, 3rd and 5th interview but no 4th interview.  BLS derived	1	NUM(8)
HH_CU_Q	Count of CUs in household  BLS derived	3269	NUM(2)
HH_CU_Q_		3271	CHAR(1)
HHID	Identifier of household with more than one CU. Household with only one CU will be set to missing.  BLS derived	3272	NUM(3)
HHID_		3275	CHAR(1)

**m. SUMMARY EXPENDITURE DATA**

For each summary expenditure category listed below there are two variables. They apportion expenditures reported for the three-month reference period of the interview to the calendar quarters, relative to the month of interview, in which the expenditures occurred. The first variable contains expenditures made by the CU in the calendar quarter previous to the month of interview. These "previous quarter" expenditure variables are identified by "PQ" placed as the last two letters of the variable name. The second variable contains expenditures made in the calendar quarter of the month of interview (last 2 letters of the variable name 'CQ'). So if CUs were interviewed in May (when they reported their February, March, and April expenditures), the "PQ" variable would contain their February and March expenditures since the previous calendar quarter to a May interview is from January to March. The "CQ" variable for these CUs would contain only their April expenditures. The variables are set up this way to facilitate analysis by calendar time period. For example, to calculate an expenditure category mean for a given calendar quarter, expenditures from the "CQ" variable for interviews conducted during the quarter of interest are added to amounts from the "PQ" variable for interviews conducted during the subsequent quarter prior to dividing by the number of observations. To derive expenditure statistics by collection period, i.e., for interviews conducted during a specific period, it is necessary to obtain all expenditures reported during each interview by summing the "PQ" and "CQ" variables of the desired expenditure category. See Section V.A.1.b. CALENDAR PERIOD VERSUS COLLECTION PERIOD for a detailed explanation of calendar and collection periods.

All of the following summary level variables are BLS derived. The composition of each summary expenditure variable is given below the variable description. Underlined UCCs may not be represented in all interview quarters. The quarter in which the deletion (addition) to the summary expenditure variable occurs is denoted by a leading superscript directly prior to the UCC code. For example, <sup>A971</sup><UCC> or <sup>D971</sup><UCC> identifies an addition or deletion of a given UCC to the summary expenditure variable beginning in Q971.

**PLEASE NOTE THE FOLLOWING:**

During the CU's fifth interview, respondents are asked to provide annual (not quarterly) expenditure amounts for cash contributions, occupational expenses, and finance charges (excluding auto

loans and home mortgages) in the questionnaire's annual supplement. These data are mapped to a quarterly time frame and are assigned to UCCs 710110, 800801, 800810, 800820, 800830, 800840, 800850, 800860, and 900001. There are no values for these UCCs for CUs in their second through fourth interviews. These UCCs are components of CASHCOPQ(CQ) (800801 800810 800820 800830 800840 800850 800860) and MISC2PQ(CQ) (710110 900001).

CASHCOPQ(CQ) requires some modification depending on the type of analysis performed. If the intent is to analyze the behavior of cash giving, only fifth interview families should be selected for the analysis. If population or sample estimates such as expenditure means are desired, CASHCOPQ(CQ) needs to be multiplied by 4 to approximate values for those CUs that are not in their fifth interview.

MISC2PQ(CQ) contains UCCs that are a subset of those included in MISCPQ(CQ) – miscellaneous expenditures. Component UCCs in MISCPQ(CQ) have been separated according to collection method. UCCs for which the values are obtained from questions asked in interviews 2 through 5 are now in MISC1PQ(CQ), while MISC2PQ(CQ) contains those UCCs from questions asked only in the fifth interview. To obtain population or sample estimates, the summary variable MISCX4PQ(CQ) has been created. It is comprised of MISC1PQ(CQ) expenditures and MISC2PQ(CQ) expenditures that have been multiplied by four, in order to account for families not in their fifth interviews. Similarly, TOTEX4PQ(CQ) reflects the adjustments for “non-fifth interview” families in MISC2PQ(CQ) and CASHCOPQ(CQ). Please be aware that MISCX4CQ(PQ) and TOTEX4PQ(CQ) overestimate the values of CASHCOPQ(CQ) and MISC2PQ(CQ) for “fifth interview” CUs and should only be used for population estimates.

## **2. MEMBER CHARACTERISTICS AND INCOME (MEMB) FILE**

The "MEMB" file, also referred to as the "Member Characteristics and Income" file, contains selected characteristics for each CU member, including identification of relationship to reference person. Characteristics for the reference person and spouse appear on both the MEMB file and FMLY file.

Demographic characteristic data, such as age of CU member, refer to the member status on the date of the interview. Characteristic information may change between interviews. Income data are collected in the second and fifth interviews for all CU members over 13 years of age and in the third and fourth interviews for members over 13 who are new to the CU or who previously reported not working and are now working. Member income data from the second interview are carried over to the third and fourth interviews subject to the above conditions. Income variables contain annual values for the 12 months prior to the interview month. Income taxes withheld and pension and retirement contributions are shown both annually and as deductions from the member's last paycheck. When there is a valid nonresponse, or where nonresponse occurs and there is no imputation, there will be missing values. The type of nonresponse is explained by associated data flag variables described in Section III.C. DATA FLAGS.

### **a. CU AND MEMBER IDENTIFIERS**

<b>VARIABLE</b>	<b>ITEM DESCRIPTION</b>	<b>START POSITION</b>	<b>FORMAT</b>
NEWID	CU identification number. Digits 1-7 (CU sequence number, 0000001 through 9999999) uniquely identify the CU. Digit 8 is the interview number, 2 through 5.  It is possible for a CU to skip an interview. For example, a CU could have a 2nd, 3rd and 5th interview but no 4th interview.  BLS derived	1	NUM(8)
MEMBNO	Person line number  Control Card 16	151	NUM(2)

### 3. **MONTHLY EXPENDITURES (MTAB) FILE**

In the MTAB file, each expenditure reported by a CU is identified by UCC, gift/nongift status, and month in which the expenditure occurred. UCCs are six digit codes that identify items or groups of items. (See Section XIII.A for a listing of UCCs.) The expenditure data record purchases that were made during the three month period prior to the month of the interview. There may be more than one record for a UCC in a single month if that is what was reported to the interviewer. There are no missing values in this file. If no expenditure was reported for the item(s) represented by a UCC, then there is no record for the UCC on the file.

The following UCCs are from questions asked only in the 2nd or 5th interviews.

006001	Total amount owed to creditors (2nd interview)
006002	Total amount owed to creditors (5th interview)
710110	Finance charges, excluding mortgage and vehicles (5th interview)

NOTE: To be used at the macro level, the above UCCs need to be multiplied by 4 in order to account for those CUs that are not asked these questions.

VARIABLE	ITEM DESCRIPTION	START POSITION	FORMAT
NEWID	CU identification number. Digits 1-7 (CU sequence number, 0000001 through 9999999) uniquely identify the CU. Digit 8 is the interview number, 2 through 5.  It is possible for a CU to skip an interview. For example, a CU could have a 2nd, 3rd and 5th interview but no 4th interview.  BLS derived	1	NUM(8)
UCC	Universal Classification Code  See Section XIII.A. for a listing of MTAB UCC codes and titles.  BLS derived	9	CHAR(6)
COST	Cost *L  BLS derived	15	NUM(12,4)

BLS derived

### 4. **INCOME (ITAB) FILE**

The "ITAB" file, also referred to as the "Income" file, contains CU characteristics and income data. This file is created directly from the FMLY file and contains the same annual and point-of-interview data in a monthly format. It was created to facilitate computer processing when linking CU income and characteristics data with MTAB expenditure data. As such, the file structure is similar to MTAB. Each characteristic and income item is identified by UCC (See Section XIII.B. for a listing of UCCs), gift/nongift status, and month. There are no records with missing values in ITAB. If the corresponding FMLY file variable contained a missing value, there is no record for the UCC.

The following UCCs are from questions asked only in the 5th interview. Therefore, there will be no values for these UCCs for CUs in their 2nd through 4th interviews. They have been multiplied by 4 because these data are used as estimated values for those CUs not asked the questions in that particular quarter. Therefore, to be used at the micro level they should be divided by 4. For example, if a CU reports \$50,000 for cash contributions for support to persons not in the CU for the past 12 months, the amount of  $(\$50,000 \times 4) / 12 = \$16666.67$  is entered as the cost for each of the 3 months of the quarter for UCC 800801. It is multiplied by 4 because only one-fourth of all CUs interviewed in a quarter are asked this question (those in the fifth interview) and it is divided by 12 to make it a monthly figure. To obtain the annual value for the CU, sum the cost for the 3 months, for the following UCCs:

001000	800810
001010	800820
001210	800830
001220	800840
002010	800850
002020	800860
002030	900001
003000	920010
003100	920020
800801	920030
800802	920040

UCCs, 800801, 800810-800860, and 900001 are used to calculate total expenditures in CE publications. These UCCs are not included when calculating total expenditures for creating the FMLY variable ERANKMTH, which is used for expenditure ranking, because including these UCCs would increase total expenditures of only CUs asked these questions, resulting in misleading rankings. For the summary variables in the FMLY file, these UCCs were included, but not multiplied by 4.

<b>VARIABLE</b>	<b>ITEM DESCRIPTION</b>	<b>START POSITION</b>	<b>FORMAT</b>

## 5. DETAILED EXPENDITURES (EXPEN) FILES

### a. SECTION 1 GENERAL SURVEY INFORMATION (APL)

#### PART C Major Household Appliances - For New Consumer Units Only

VARIABLE	ITEM DESCRIPTION	START POSITION	FORMAT
QYEAR	Quarter and year of the interview, for use in matching to the other files CODED 19971 1997, 1st quarter 19972 1997, 2nd quarter 19973 1997, 3rd quarter 19974 1997, 4th quarter 19981 1998, 1st quarter  BLS derived	1	CHAR(5)
NEWID	CU identification number. Digits 1-7 (CU sequence number, 0000001 through 9999999) uniquely identify the CU. Digit 8 is the interview number, 2 through 5.  It is possible for a CU to skip an interview. For example, a CU could have a 2nd, 3rd and 5th interview but no 4th interview.  BLS derived	6	NUM(8)
SEQNO	Sequence number, uniquely identifies each EXPN record based on order of entries on survey questionnaire  BLS derived	14	NUM(3)
ALCNO	Allocation number, field in common to all rows. Identifies rows that are the result of allocation. If ALCNO is greater than zero then the observation is a result of allocation. ALCNO can be used in conjunction with SEQNO to derive a value which has been allocated and written over with the flag H (see the notes under "ALLOCATION AND RECORD ORIGIN" for instructions).  BLS derived	17	NUM(3)
REC_ORIG	Describes the origin of the record, field in common to all records (see "ALLOCATION AND RECORD ORIGIN" for the codes and their descriptions).  CENSUS derived	20	CHAR(1)

This file contains an inventory of major household appliances belonging to the CU. These questions are asked at the first interview and the information is carried forward to subsequent interviews through the

inventory update process. Note that the title of this section on the questionnaire each user has received indicates it is asked "For New Consumer Units Only". This is because this questionnaire is used for the second through fifth interviews. The section would only be completed if a new CU had moved to the sample address, replacing an old CU that had previously participated.

VARIABLE	ITEM DESCRIPTION	START POSITION	FORMAT
MAJCODE	Does your CU have any of the following appliances? ## 6. **PROCESSING FILES**

### a. **AGGregation file**

X:\INTRVW97\AGGI97.TXT (SD2)

The AGG file shows which UCC/Gift code combinations go into each category listed in the sample table produced by the microdata file verification and estimation program (see Section VII.A. SAMPLE PROGRAM). It designates each category with a unique 6-digit line number. It is formatted as follows:

DESCRIPTION	START POSITION	FORMAT
UCC (Universal Classification Code)	3	CHAR(6)
Gift	10	CHAR(1)
CODED		
1 Yes		
2 No		
Line Number: represents a line in the sample table	15	CHAR(6)

**b. LABel file**

X:\INTRVW97\LABELI97.TXT (SD2)

The LAB file assigns an identification label to each AGG file line number. It is formatted as follows:

DESCRIPTION	START POSITION	FORMAT
Line Number: represents a line in the sample table	1	CHAR(6)
Label: descriptive label in the sample table (with leading blanks)	8	CHAR(73)

**c. UCC file**

X:\INTRVW97\UCCI97.TXT (SD2)

The UCC file contains UCCs and their abbreviated titles, identifying the expenditure, income, or demographic item represented by each UCC. It is formatted as follows:

DESCRIPTION	START POSITION	FORMAT
UCC	1	CHAR(6)
UCC title	8	CHAR(50)

(See Section XIII.A. EXPENDITURE UCCS ON MTAB FILE and XIII.B. INCOME AND RELATED UCCS ON ITAB FILE for a list of UCCs and their full titles by file--expenditure (MTAB) or income (ITAB).)

d. **VEHicle file**

X:\INTRVW97\VEHI97.TXT (SD2)

The VEH file contains vehicle make and model codes created by the Bureau of the Census. These codes can be found under the variable MKMDLY in EXPN Section 11, Part B (Owned Vehicles - Detailed Questions). The file is formatted as follows:

DESCRIPTION	START POSITION	FORMAT
MKMDLY code	1	CHAR(4)
Make and model	6	CHAR(69)

e. **SAMPLe program file**

X:\INTRVW97\SAMPLI97.TXT (SD2)

The SAMPLI97 file contains the computer program used in Section VII.A. SAMPLE PROGRAM of the documentation. This file has been created to provide programming assistance.

## IV.TOPCODING AND OTHER NONDISCLOSURE REQUIREMENTS

Sensitive CU data are changed so that users will not be able to identify CUs who participated in the survey. Topcoding refers to the replacement of data in cases where the value of the original data exceeds prescribed critical values. Critical values for each variable containing sensitive data are calculated in accordance with Census Disclosure Review Board guidelines. Each observation that falls outside the critical value is replaced with a topcoded value that represents the mean of the subset of all outlying observations. All five quarters of data in the CE microdata release are used when calculating the critical value and topcode amounts. If an observation is topcoded, the flag variable assigned to that observation is set to 'T'.

Since the critical value and mean of the set of values outside the critical value may differ with each annual (five-quarter) release, the topcode values may change annually and be applied at a different starting point. By topcoding values in this manner, the first moment will be preserved for each five-quarter data release when using the total sample. This, however, will not be the case when means are estimated by characteristic, because topcode values are not calculated by characteristic.

### A. CU CHARACTERISTICS AND INCOME FILE (FMLY)

The following FMLY file variables are subject to topcoding.

AGE_REF	Age of reference person
AGE2	Age of spouse
ALIOTHX	Amount received from other regular contributions including alimony
BSINVSTX	Amount of investment in own farm or business
CHDLMPX	Amount received from lump sum child support payment
CHDOTHX	Amount received from other child support payments
CKBKACTX	Amount in checking, brokerage and other similar accounts

COMPBNDX	Difference in amount held in U.S. Savings bonds
COMPCKGX	Difference in amount held in checking accounts
COMPOWDX	Difference in amount of money owed to CU
COMPSAVX	Difference in amount held in savings accounts
COMPSECX	Difference in estimated market value of all stocks, bonds, or mutual funds including broker fees
FEDRFNDX	Amount of refund received from Federal income tax
FEDTAXX	Amount of Federal income tax paid in addition to that withheld
FININCX	Amount received from regular income from dividends, royalties, estates or trusts
INCLOSSA	Amount of net income or loss received from roomers or boarders
INCLOSSB	Amount of net income or loss received from other rental units
INSRFNDX	Amount of refund received from insurance policies
INTEARNX	Amount received from interest on savings accounts or bonds
LUMPSUMX	Amount received from lump sum receipts
MISCTAXX	Amount of other taxes paid but not reported elsewhere
MONEYOWDX	Amount of money owed to CU by persons outside CU
OCCEXPX	Amount of occupational expenses
OTHRFNDX	Amount of refund received from other sources
OTHRINCX	Amount received from other money income
PENSIONX	Amount received from pensions or annuities
PTAXRFDX	Amount of refund received from property taxes
PURSSECX	Purchase price of stocks, bonds, or mutual funds
RENTEQVX	Rental equivalence of owned home
SALEINCX	Amount received from sale of household furnishings, equipment
SAVACCTX	Amount in savings accounts
SECESTX	Estimated market value of all stocks, bonds, mutual funds
SELLSECX	Net amount received from sales of stocks, bonds, mutual funds
SETLINSX	Amount received from settlement on surrender of any insurance policies
SLOCTAXX	Amount of state and local income tax paid in addition to that withheld
SLRFUNDX	Amount of refund received from state and local income taxes
SSOVERPX	Amount of refund received from overpayment on Social Security
TAXPROPX	Amount of personal property taxes paid
USBNDX	Amount in U.S. Savings bonds
WDBSASTX	Amount of assets withdrawn from own farm or business
WDBSGDSX	Amount of goods or services withdrawn from own farm or business

The critical values and topcode values associated with the above variables follow.

<b>Variable</b>	<b><u>Critical value +</u></b>	<b><u>Critical value -</u></b>	<b><u>Topcode value +</u></b>	<b><u>Topcode value -</u></b>

WDBSGDSX	25,000	-	55,000	-

Some income variables that are subject to topcoding are constructed by summing up the values of “lower level” MEMB or FMLY file component variables. These variables are not topcoded by the conventional method of replacement with a topcode value. Instead the variables’ components are summed normally and the variables are flagged as topcoded if one of their component variables is topcoded. Following are the income variables that are calculated using values of their component variables. (See the descriptions of each variable in Sections III.F.1.e. INCOME - III.F.1.h. RETIREMENT AND PENSION DEDUCTIONS for a list of component variables.)

EARNINCX	Amount of CU income from earnings before taxes
FAMTFEDX	Amount of Federal income tax deducted from last pay, annualized for all CU members
FFRMINCX	Amount of income or loss received from own farm
FGOVRETX	Amount of government retirement deducted from last pay, annualized for all CU members
FINCATAX	Amount of CU income after taxes
FINCBTAX	Amount of CU income before taxes
FINDRETX	Amount of money placed in individual retirement plan
FJSSDEDX	Estimated amount of annual Social Security contribution
FNONFRMX	Amount of income or loss received from nonfarm business
FPRIPENX	Amount of private pension fund deducted from last pay, annualized for all CU members
FRRDEDX	Amount of Railroad Retirement deducted from last pay, annualized for all CU members
FSALARYX	Amount received from wage and salary income before deductions
FSLTAXX	Amount of state and local income taxes deducted from last pay, annualized for all CU members
NO_EARNX	Amount of income from sources other than earnings before taxes
NONINCMX	Amount of other money receipts excluded from family income
TOTTXPDX	Amount of personal taxes paid

Here are some examples of situations that may occur. The value for the variable FFRMINCX (family income from own farm) is computed as the sum of the values reported for the variable FARMINCX (member income from nonfarm business) from the MEMB file. FARMINCX is subject to topcoding beyond the critical value of \$70,000 (-\$24,000). The topcode value for FARMINCX is \$130,333 (-\$40,500). (See Section IV.B. MEMBER CHARACTERISTICS AND INCOME FILE (MEMB)).

<u>FARMINCX</u>		<u>FFRMINCX</u>	
<u>CU</u>	<u>REPORTED</u>	<u>AFTER TOPCODING</u>	<u>FLAGGED AS TOPCODED?</u>
CU 1:	MEMB1 \$70,000	\$70,000	
	MEMB2 70,000	70,000	140,000 No
CU 2:	MEMB1 135,000	130,333	
	MEMB2 5,000	5,000	135,333 Yes
CU 3	MEMB1 80,000	130,333	
	MEMB2 50,000	50,000	180,333 Yes
CU 4	MEMB1 65,000	65,000	
	MEMB2 -25,000	-40,500	24,500 Yes

While CUs 1 and 2 each originally report \$140,000 in FARMINCX, topcoding is done only on the value reported by MEMB1 of CU2. Thus, the value for FFRMINCX for CU2 is lower than for CU1 and is flagged as topcoded while CU1 is not. By using the mean of the subset of observations that are above (below) the critical value as the topcode amount, values on the public use data can be either below or above the actual reported value. Note that while CU2 has a topcoded value slightly below the reported value, CU3's topcoded FFRMINCX value (\$180,333) is higher than the amount that it reported (\$130,000). The case of CU4 demonstrates that the value for FFRMINCX can be much lower than other topcoding situations, yet still be flagged as topcoded. This is due to the presence of a negative value (loss) for FARMINCX reported by MEMB2. The reverse can also occur.

The value of the variable, STATE, which identifies the state of residence, must be suppressed for some observations to meet the Census Disclosure Review Board's criterion that the smallest geographically identifiable area have a population of at least 100,000. STATE data were evaluated vis-à-vis the POPSIZE, REGION, and BLS\_URBN variables, which show the population size of the geographic area that is sampled, the four Census regions, and urban/rural status respectively. Some STATE codes were suppressed because, in combination with these variables, they could be used to identify areas of 100,000 or less. On approximately 17 percent of the records on the FMLY files the STATE variable is blank. The STATE flag (STATE\_) is given a value of 'T' if STATE is suppressed.

A small proportion of STATE codes are replaced with codes of states other than the state where the CU resides. By re-coding in this manner, suppression of POPSIZE and REGION may be avoided. (In past releases selected observations of POPSIZE and REGION required suppression.) If a CU's state of residence is re-coded with another state's code, the flag variable (STATE\_) of the re-coded observation is assigned an 'R'. The flag variable is also assigned an 'R' for either all or a portion of other observations from that state. In total, approximately 4% of observations of STATE\_ are assigned an 'R'.

01	Alabama	*28	Mississippi
02	Alaska	**29	Missouri
RR 04	Arizona	31	Nebraska
*05	Arkansas	R 32	Nevada
**06	California	R 33	New Hampshire

21	Kentucky	49	Utah
22	Louisiana	50	Vermont
R*23	Maine	**51	Virginia
24	Maryland	**53	Washington
25	Massachusetts	<sup>R</sup> 54	West Virginia
**26	Michigan	55	Wisconsin
**27	Minnesota		

\* indicates that the STATE code has been suppressed for all sampled CUs in that state (STATE\_ = 'T' for all observations).

\*\* indicates that the STATE code has been suppressed for some sampled CUs in that state (STATE\_ = 'T' for some observations).

R indicates that either all observations from this state have been re-coded or all strata<sup>1</sup> of observations from this state include "re-codes" from other states.

RR indicates that either some observations from this state have been re-coded or at least one stratum<sup>1</sup> of observations from this state includes "re-codes" from other states.

R\* indicates that the STATE code has been suppressed for some sampled CUs in that state and, either STATE has been re-coded or the state includes "re-codes" from other states in all strata<sup>1</sup>.

RR\*\* indicates that the STATE code has been suppressed for some sampled CUs in that state and, either STATE has been re-coded or the state includes "re-codes" from other states in at least one stratum<sup>1</sup>.

<sup>1</sup> A STATE stratum is a unique POPSIZE and BLS\_URBN combination.

States not listed are not in the CE sample.

## B. MEMBER CHARACTERISTICS AND INCOME FILE (MEMB)

The following MEMB file variables are subject to topcoding.

AGE	Age of member
AMTFED	Amount of Federal income tax deducted from last pay
ANFEDTX	Annual amount of Federal income tax deducted from pay
ANGOVRTX	Annual amount of government retirement deducted from pay
ANPRVPNX	Annual amount of private pension fund deducted from pay
ANRRDEDX	Annual amount of Railroad Retirement deducted from pay
ANSLTX	Annual amount of state and local income taxes deducted from pay
FARMINCX	Amount of income or loss received from own farm
GOVRETX	Amount of government retirement deducted from last pay
GROSPAYX	Amount of last gross pay
INDRETX	Amount of money placed in individual retirement plan
JSSDEDX	Estimated annual Social Security contribution
NONFARMX	Amount of income or loss received from own nonfarm business
PRIVPENX	Amount of private pension fund deducted from last pay
RRRDEDX	Amount of Railroad Retirement deducted from last pay
SALARYX	Amount received from wage and salary income before deductions
SLFEMPSS	Amount of self-employment Social Security contribution
SLTAXX	Amount of state and local income taxes deducted last pay

The critical values and topcode values associated with the above variables follow.

<b>Variable</b>	<b>Critical value +</b>	<b>Critical value -</b>	<b>Topcode value +</b>	<b>Topcode value -</b>
AGE	90	-	93	-
AMTFED	800	-	2,033	-
ANFEDTX	16,064	-	28,350	-
ANGOVRTX	6,000	-	7,618	-
ANPRVPNX	9,579	-	13,835	-
ANRRDEDX	3,300	-	6,100	-
ANSLTX	5,455	-	9,093	-
FARMINCX	70,000	-24,000	130,333	-40,500
GOVRETX	435	-	897	-
GROSPAYX	4,500	-	14,305	-
INDRETX	12,000	-	28,990	-
JSSDEDX	5,577	-	7,483	-
NONFARMX	150,000	-100,000	265,000	-163,669
PRIVPENX	500	-	1,246	-
RRRDEDX	260	-	306	-
SALARYX	150,000	-	236,169	-
SLFEMPSS	11,010	-	12,921	-
SLTAXX	250	-	562	-

#### Special suppression for MEMB file variables

The five MEMB file variables--AMTFED, GOVRETX, PRIVPENX, RRRDEDX, and SLTAXX--describe deductions from the most recent pay. These variables are used in conjunction with GROSPAYX (amount of last gross pay) and SALARYX (annual wage and salary income) to derive ANFEDTX, ANGOVRTX, ANPRVPNX, ANRRDEDX, and ANSLTX, which represent the estimated annual deductions for each of these income deduction categories. For example, the estimated annual Federal income tax deduction from pay is calculated as

$$(1) \text{ANFEDTX} = (\text{SALARYX} (\text{AMTFED}/\text{GROSPAYX})).$$

Note that SALARYX can be estimated by using the above terms and rearranging such that

$$(2) \text{SALARYX} = (\text{ANFEDTX} (\text{GROSPAYX}/\text{AMTFED})).$$

In the above example, a problem with disclosure may arise when neither ANFEDTX, GROSPAYX, nor AMTFED are topcoded, *but* SALARYX is. In this situation SALARYX can be recalculated to obtain its original value by inserting the non-topcoded values into equation (2) and solving. In order to prevent this, the non-topcoded terms in equation (2) will be suppressed (blanked out) and their associated flags will be assigned a value of 'T'. The following chart describes in detail the specific rules that are applied to prevent the potential disclosure outlined above.

If SALARYX is greater than the critical value but ANFEDTX, GROSPAYX, and AMTFED are not, then the values for ANFEDTX, GROSPAYX, and AMTFED are suppressed and their flag variables are assigned a value of 'T'.

If SALARYX is greater than the critical value but ANGOVRTX, GROSPAYX, and GOVRETX are not, then the values for ANGOVRTX, GROSPAYX, and GOVRETX are suppressed and their flag variables are assigned a value of 'T'.

If SALARYX is greater than the critical value but ANPRVPNX, GROSPAYX, and PRIVPENX are not, then the values for ANPRVPNX, GROSPAYX, and PRIVPENX are suppressed and their flag variables are assigned a value of 'T'.

If SALARYX is greater than the critical value but ANRRDEDX, GROSPAYX, and RRRDEDX are not, then the values for ANRRDEDX, GROSPAYX, and RRRDEDX are suppressed and their flag variables are assigned a value of 'T'.

If SALARYX is greater than the critical value but ANSLTX, GROSPAYX, and SLTAXX are not, then the values for ANSLTX, GROSPAYX, and SLTAXX are suppressed and their flag variables are assigned a value of 'T'.

## C. MONTHLY EXPENDITURE FILE (MTAB)

The MTAB variable COST is subject to topcoding for the following UCCs.

<b><u>UCC</u></b>	<b><u>Description</u></b>
210110	Rent of dwelling
210210	Lodging away from home
210310	Housing for someone at school
210901	Ground rent, owned home
210902	Ground rent, owned vacation home
550320	Medical equipment for general use
550330	Supportive or convalescent medical equipment
560110	Physicians' services
560210	Dental services
560310	Eye care services
560330	Lab tests and x-rays
560400	Services by professionals other than physicians
570110	Hospital room
570210	Hospital service other than room
570220	Nursing or convalescent home care
570230	Other medical care service
570240	Medical care in retirement community
570901	Rental of medical equipment
570903	Rental of supportive, convalescent equipment
600132	Purchase of boat with motor
600138	Trade-in allowance for boats with motors
790710	Purchase other property excluding commons
790810	Sale price of other property
790820	Mortgage held after sale, other property
790910	Special or lump mortgage payment, other property
790920	Reduction of mortgage principal, other property
790930	Original mortgage amount, other property
790940	Reduction of mortgage principal, home equity loan, other property
790950	Original loan amount, home equity loan, other property
800721	Market value of owned home
810101	Purchase excluding commons, owned home
810102	Purchase price excluding commons, owned vacation home
820101	Selling price, owned home
820102	Selling price, owned vacation home
820201	Principal amount trust held, owned home
820202	Principal amount trust held, owned vacation home
830101	Special or lump mortgage payment, owned home

<b><u>UCC</u></b>	<b><u>Description</u></b>
830102	Special or lump mortgage payment, owned vacation home
830201	Reduction mortgage principal, owned home
830202	Reduction mortgage principal, owned vacation home
830203	Reduction mortgage principal, home equity loan, owned home
830204	Reduction mortgage principal, home equity loan, owned vacation home
830301	Original mortgage amount, owned home
830302	Original mortgage amount, owned vacation home
830303	Original loan amount, home equity loan, owned home
830304	Original loan amount, home equity loan, owned vacation home
860600	Amount boat with motor sold or reimbursed
870701	Boat with motor, purchase not financed
880120	Reduction of principal, line of credit, owned home
880220	Reduction of principal, line of credit, other property
880320	Reduction of principal, line of credit, owned vacation home
910050	Rental equivalence of owned home
910060	Estimated monthly rental value, time share
910070	Estimated monthly rental value, owned vacation home
910080	Rent received for time share
910090	Rent received for owned vacation home

If the value of COST is greater (less) than the designated critical values for the above UCCs, COST is set to the topcode value and the associated flag variable, COST\_, is set to 'T'. The critical values and topcode values (rounded to the nearest dollar) of the variable COST that are associated with the above UCCs follow.

<b><u>UCC</u></b>	<b><u>Critical value +</u></b>	<b><u>Critical value -</u></b>	<b><u>Topcode value +</u></b>	<b><u>Topcode value -</u></b>	<b><u>Mapped from</u></b>	<b><u>Condition</u></b>

#### **D. INCOME FILE (ITAB)**

Data in the ITAB file are selected annual data from the FMLY file expressed in a monthly form (divided by 12). The ITAB variable VALUE is subject to topcoding for the following UCCs.

<u>UCC</u>	<u>Description</u>
001000	Purchase price of stocks, bonds, or mutual funds
001010	Net amount received from sales of stocks, bonds, mutual funds
001210	Amount of investment in own farm or business
001220	Amount of assets, goods, and services withdrawn from own farm or business
002010	Difference in amount held in savings accounts
002020	Difference in amount held in checking accounts
002030	Difference in amount held in U.S. Savings bonds
003000	Difference in amount of money owed to CU
003100	Amount received from settlement on surrender of any insurance policies
800910	Amount of government retirement deducted from last pay, annualized for all CU members
800920	Amount of Railroad Retirement deducted from last pay, annualized for all CU members
800931	Amount of private pension fund deducted from last pay, annualized for all CU members
900001	Amount of occupational expenses
900040	Amount received from pensions or annuities
900050	Amount received from regular income from dividends, royalties, estates or trusts
900060	Amount of net income or loss received from roomers or boarders
900070	Amount of net income or loss received from other rental units
900080	Amount received from interest on savings accounts or bonds
900131	Amount received from other child support payments
900132	Amount received from other regular contributions including alimony
900140	Amount received from other money income
910000	Amount received from lump sum receipts
910010	Amount received from sale of household furnishings, equipment
910020	Amount of refund received from overpayment on Social Security

<b><u>UCC</u></b>	<b><u>Description</u></b>
910030	Amount of refund received from insurance policies
910040	Amount of refund received from property taxes
910041	Amount received from lump sum child support payment
920010	Amount in savings accounts
920020	Amount in checking, brokerage and other similar accounts
920030	Amount in U.S. Savings bonds
920040	Estimated market value all stocks, bonds, mutual funds
950000	Amount of Federal income tax paid
950001	Amount of refund received from Federal income tax
950010	Amount of state and local income taxes paid
950011	Amount of refund received from state and local taxes
950021	Amount of other taxes paid
950022	Amount of personal property taxes paid
950023	Amount of refund received from other sources
980020	Age of reference person

If VALUE is greater (less) than the designated critical values for the above UCCs, VALUE is set to the topcode value and the associated flag variable, VALUE\_, is set to 'T'. The critical values and topcode values (rounded to the nearest dollar) of the variable VALUE that are associated with the above UCCs follow.

<b><u>UCC</u></b>	<b><u>Critical value +</u></b>	<b><u>Critical value -</u></b>	<b><u>Topcode value +</u></b>	<b><u>Topcode value -</u></b>

<b><u>UCC</u></b>	<b><u>Critical value +</u></b>	<b><u>Critical value -</u></b>	<b><u>Topcode value +</u></b>	<b><u>Topcode value -</u></b>
950011	-	-108	-	-212
950021	316	-	602	-
950022	367	-	596	-
950023	-	-125	-	-603
980020	7.5	-	7.8	-

<sup>1</sup> FEDTAXX (amount of Federal tax paid in addition to that withheld) and FAMTFEDX (Federal tax withheld from last pay annualized for all CU members) are both mapped to UCC 950000 as separate records. Records for UCC 950000 that represent FAMTFEDX are topcoded through their components (AMTFED) at the MEMB level and thus, these records will not have an ITAB critical value. ITAB records for UCC 950000 that represent FEDTAXX are topcoded for all amounts greater than \$1,334.

<sup>2</sup> SLOCTAXX (amount of state and local taxes paid in addition to that withheld) and FSLTAXX (state and local income tax deduction from last pay annualized for all CU members) are both mapped to UCC 950010 as separate records. Records for UCC 950010 that represent FSLTAXX are topcoded through their components (SLTAXX) at the MEMB level and thus, these records will not have an ITAB critical value. Create the ITAB VALUE field for these records by dividing FSLTAXX by 12. If FSLTAXX is topcoded, then set VALUE\_ to 'T'. ITAB records for UCC 950010 that represent SLOCTAXX are topcoded for all amounts greater than \$250.

VALUE for the following income UCCs is topcoded because the FMLY file variables corresponding to these UCCs are topcoded due to recalculation. (See Section IV.A. CU CHARACTERISTICS AND INCOME FILE on topcoding of FMLY variables.)

<b><u>UCC</u></b>	<b><u>FMLY variable</u></b>	<b><u>Description</u></b>
800910	FGOVRETX	Amount of government retirement deducted from last pay, annualized for all CU members
800920	FRRDEDX	Amount of Railroad Retirement deducted from last pay, annualized for all CU members
800931	FPRIPENX	Amount of private pension fund deducted from last pay, annualized for all CU members
800932	FINDRETX	Amount of money placed in individual retirement plan
800940	FJSSDEDX	Estimated amount of annual Social Security contribution
900000	FSALARYX	Amount received from wage and salary income before deductions
900010	FNONFRMX	Amount of income or loss received from own nonfarm business
900020	FFRMINCX	Amount of income or loss received from own farm
980000	FINCBTAX	Amount of CU income before taxes
980070	FINCATAX	Amount of CU income after taxes

## E. DETAILED EXPENDITURE FILES (EXPN)

The following EXPN file variables are subject to topcoding.

<b><u>Survey Section</u></b>	<b><u>File name</u></b>	<b><u>Variable</u></b>	<b><u>Description</u></b>
2. A&B.	RNT	QRT3MCMX	Total rental payments made in reference period, adjusted for business and rooms rented to others
		QPK3MCMX	Total paid for parking in reference period
3. B.	OPB	PROPVAX	About how much do you think this property would sell for on today's market?
		OWN_PURX	What was the total price paid for the property, not including closing costs?
3. D.	OPD	DISPX	What was the selling price (trade-in value)?
		TRUSTX	What was the amount of the mortgage you financed?
3. F.	MOR	ORGMRTX	What was the amount of the mortgage when you obtained it, excluding any interest?
		MRTPTMX	Mortgage payment, including escrow
		QBLNCM1X	Principal balance outstanding at beginning of month, 3 months ago

<b>Survey Section</b>	<b>File name</b>	<b>Variable</b>	<b>Description</b>
3. G.	HEL	QBLNCM2X	Principal balance outstanding at beginning of month, 2 months ago
		QBLNCM3X	Principal balance outstanding at beginning of month, 1 month ago
		QPRINM1X	Amount of principal paid during first month of reference period
		QPRINM2X	Amount of principal paid during second month of reference period
		QPRINM3X	Amount of principal paid during third month of reference period
		ORGMRTG	What was the amount of the lump sum home equity loan when you obtained it, excluding any interest?
		MRTPMTG	Loan payment
		QBLNCM1G	Principal balance outstanding at beginning of month, 3 months ago
		QBLNCM2G	Principal balance outstanding at beginning of month, 2 months ago
		QBLNCM3G	Principal balance outstanding at beginning of month, 1 month ago
		QPRINM1G	Amount of principal paid during first month of reference period
		QPRINM2G	Amount of principal paid during second month of reference period
		QPRINM3G	Amount of principal paid during third month of reference period
3. H.	OPH	JLCPRINX	Estimated amount of principal paid on loan during reference period
3. I.	OPI	JFEETOTX	Amount of regular condo fee for management services, adjusted for business
		QSPCLX	Total amount of special payments for management services, adjusted for business
		QLR3MCMX	Amount paid for ground or land rent, adjusted for business
		QLMPSUMX	Amount paid for mortgage in special or lump sum payments during reference period
		RNTEQVX	Monthly rental equivalence of owned home
11. B.	OVB	<i>For confidentiality reasons, records with VEHICYB='190' (private plane) are not included on the public use files.</i>	
		NETPURX	Amount paid for boat with motor
		<i>If NETPURX is topcoded, then the following variables are suppressed (blanked out) and their flags are given a 'T'.</i>	
		TRADEX	How much was the trade in allowance received?
		EMPLEXPX	How much of the amount or price was paid by an employer?
		DNPAYMTX	What was the amount of the cash down payment?
		PRINCIPX	How much was borrowed, excluding any interest?
		PAYMENTX	What is the amount of each payment?
		QBALNM1X	Principal balance outstanding at the beginning of first month of reference period
		QVINTM1X	Amount of interest paid during first month of reference period
		QVPRIM1X	Amount of principal paid during first month of reference period
		QBALNM2X	Principal balance outstanding at the beginning of second month of reference period
		QVINTM2X	Amount of interest paid during second month of reference period
		QVPRIM2X	Amount of principal paid during second month of reference period
		QBALNM3X	Principal balance outstanding at the beginning of third month of reference period
		QVINTM3X	Amount of interest paid during third month of reference period
		QVPRIM3X	Amount of principal paid during third month of reference period
		QTRADEX	Amount paid for vehicle after trade- in allowance minus amount of cost paid by employer
		QADITR1X	Amount of interest paid during first month of reference period, adjusted for business
		QADITR2X	Amount of interest paid during second month of reference period, adjusted for business
		QADITR3X	Amount of interest paid during third month of reference period, adjusted for business
		QDNPYMTX	Amount of down payment, adjusted for business
11. C.	OVC	<i>For confidentiality reasons, records with VEHICYC='190' (private plane) are not included on the public use files.</i>	
		SALEX	Amount boat with motor sold for
		<i>If SALEX is topcoded, then the variable FINPAYMX (How much was the final payment made on any outstanding loan?) is suppressed for that record, and flagged as topcoded.</i>	
12. A.	VEQ	<i>For confidentiality reasons, records with VOPVEHYA= '190' (Private plane) are not included on the public use microdata.</i>	
15. B.	MDB	MEDPMTX	Amount of payment for medical supplies or services
15. D.	MDC	MEDRMBX	Amount of reimbursement for medical supplies or services
16.	EDA	JEDUCNET	Net amount paid for educational expenses (housing)
18. B&C.	TRV	LDGCOSTX	Cost for hotels, motels, cottages, trailer camps, or other lodging including taxes and tips

<u>Survey Section</u>	<u>File name</u>	<u>Variable</u>	<u>Description</u>
18. D.	TRD	TOTYUPDX	Amount of (lodging) expense not covered by a business, employer, or other non-CU member (for trips funded by non-CU member)
18. E.	TRE	TRNONCUX	Amount of the (lodging) expense paid for non CU member

The critical values and topcode values associated with the above EXPN variables follow.

<u>Survey Section</u>	<u>File name</u>	<u>Variable</u>	<u>Critical value +</u>	<u>Topcode value +</u>	<u>Condition</u>

## V. ESTIMATION PROCEDURE

### A. DESCRIPTION OF PROCEDURES

The following section describes procedures for using microdata for the estimation of descriptive statistics such as aggregates and means. A sample program written in SAS that illustrates this methodology is in Section VII. MICRODATA VERIFICATION AND ESTIMATION METHODOLOGY

#### 1. GENERAL CONCEPTS

##### a. **SAMPLE VERSUS POPULATION ESTIMATES**

As described in Section X.C. WEIGHTING, each CU in the CE sample represents a given number of CUs in the U.S. population. The translation of sample CUs into a population estimate is accomplished by weighting. FINLWT21, one of the 45 weight variables associated with each CU, is used to estimate the population. Procedures for estimating sample (unweighted) and population (weighted) statistics are described in Sections V.A.2. ESTIMATION OF UNWEIGHTED STATISTICS and V.A.3. ESTIMATION OF WEIGHTED STATISTICS below.

##### b. **CALENDAR PERIOD VERSUS COLLECTION PERIOD**

Because the rotating panel design of the Interview survey has an effect on the structure of the data files, one must be aware of the distinction between calendar period and collection period in producing estimates. (See Section X.A. SURVEY SAMPLE DESIGN for a description of the panel rotation scheme.)

Respondents are asked to report expenditures made since the first of the month three months prior to the interview month. For example, if a CU is interviewed in February of 1997, they are reporting expenditures for November and December of 1996, and January of 1997. This is illustrated in the rotation chart below. The period between November 1 and January 31 is referred to as the reference period for the interview.

Month of Expenditure	Month of Interview					
	January Panel A	February Panel B	March Panel C	April Panel A	May Panel B	June Panel C
October	X					
November	X	X				
December	X	X	X			
January		X	X	X		
February			X	X	X	
March				X	X	X
April					X	X
May						X

Please note that UCCs 006001 and 006002 -- total amount owed to creditors (2nd and 5th interviews) -- do not adhere to the above mapping scheme. They are mapped to the month of the interview, *not* to preceding months.

The microdata files are organized and identified by collection period, i.e., the month of the interview. Thus, the MTAB file for the second quarter of 1997 contains expenditure data collected in interviews that took place in April, May, and June of 1997. Referring to the rotation chart, one can see that this MTAB file contains expenditures made between January 1997 and May 1997. Similarly, the MTAB file for the third quarter of 1997 (interviews conducted between July and September) contains expenditures made between April and July 1997. To obtain all expenditures made in January 1997, one should access the MTAB files for both the first and second quarters of 1997. The MTAB file for the first quarter of 1997 would contain January expenditures made by CUs interviewed in February and March 1997, while the MTAB file for the second quarter of 1997 would contain January expenditures made by CUs interviewed in April 1997.

As a consequence, users should be clear as to whether they desire estimates based on when expenditures were reported (collection period) or when expenditures were made (calendar period).

To produce an annual estimate for 1997 based on collection period, that is, from all interviews conducted in 1997, data users need data only from Q971 through Q974 files. However, to produce a 1997 annual estimate based on expenditures made in 1997 (calendar period), one needs to access five collection-quarter files, the first quarter of 1997 through the first quarter of 1998. (The estimates published by BLS are based on calendar periods that require the subsequent year's first quarter data).

The ITAB files are derived in a slightly different manner than MTAB. As was mentioned in the description of the ITAB file, the data on the file represents the conversion of annual and point-of-interview data into a monthly format compatible with MTAB. Looking at a CU interviewed in January 1997, as an example, nonfarm business income earned over the previous 12 months would be collected and recorded as such on the FMLY file. For the ITAB file, this annual amount would be divided by 12, and separate records would be created for October, November, and December each containing that amount.

The variables REF\_MO, REF\_YR, QINTRVMO, and QINTRVYR indicate reference month of expenditure, reference year of expenditure, interview month, and interview year, respectively. REF\_MO and REF\_YR, in the MTAB and ITAB files, can be used to select all data for the desired period in which expenditures were made. Because of the interview rotation pattern, there is a one-month to three-month lag between the time an expenditure occurs and the time it is reported. QINTRVMO and QINTRVYR can be used to identify the collection reference period.

In addition to its effect on the selection of data prior to estimation, this distinction between collection period and calendar period also directly affects the estimation procedure for producing means. In computing means based on data collected from all CUs interviewed in a given time frame (e.g., year, quarter, 8 months), the potential contribution of each CU to the mean is the same. That is each CU can contribute data from the entire reference period to the estimate. On the other hand, in computing means based on expenditures made in a given time frame, the potential contribution of each CU to the mean varies depending on how closely the reference period for an interview coincides with the time frame desired. To see this more clearly, refer once again to the rotation chart. To compute a mean for expenditures made during the first quarter of the year, one would obtain data from CUs interviewed between February and June. However, their potential contributions to the mean are not equal. CUs interviewed in February only contribute 'one-third' of the expenditures they made during the reference period to the estimate (their January expenditures), while CUs interviewed in April contribute all their expenditures to the estimate.

As a result, the population (the denominator in the equation for a mean) has to be adjusted to account for the difference in contribution among CUs. At BLS, we create a variable, MO\_SCOPE that shows the number of months a CU's interview can contribute to the mean or is "in scope" for the time period the estimate will cover. All CUs interviewed in the same month will have identical values for MO\_SCOPE, as their potential contribution to the mean is the same. Thus, MO\_SCOPE will be conditioned on the value of QINTRVMO (and possibly QINTRVYR).

Continuing with our example of estimating a mean for expenditures made during the first quarter of the year, we would access data from files for the first and second quarter of the year. MO\_SCOPE would be derived as explained below.

If QINTRVMO is 1 then MO\_SCOPE is 0  
 if QINTRVMO is 2 then MO\_SCOPE is 1  
 if QINTRVMO is 3 then MO\_SCOPE is 2  
 if QINTRVMO is 4 then MO\_SCOPE is 3  
 if QINTRVMO is 5 then MO\_SCOPE is 2  
 if QINTRVMO is 6 then MO\_SCOPE is 1

Note that MO\_SCOPE has a value of 0 for CUs interviewed in January, as they report expenditures for October through December, totally outside the period of interest. One could extract a data set of only CUs interviewed between February and June to eliminate that condition. How MO\_SCOPE is used in estimation will be discussed later.

### c. TIME PERIOD DIFFERENCES

It has been mentioned previously that these files contain data that can cover a variety of time periods. Values for MTAB and ITAB variables are monthly. Values for variables on the FMLY and MEMB files can vary. For example income variables are for annual time periods and demographic variables are as of the time of interview. As such, users should pay particular attention to the descriptions of variables in the detailed listings of Section III.E. DETAILED VARIABLE DESCRIPTIONS.

This is particularly important where the user may have a choice between variables on two files that contain the same data adjusted to reflect different time periods. For instance, FMLY income data are annual covering the 12-month period prior to the collection month, whereas in ITAB these income data have been converted into monthly values. Selected demographic characteristic variables in the FMLY files contain values as of the date of interview. In the ITAB files, these values are treated as if they were "annual" amounts, and are converted to monthly records by dividing the values by 12. To illustrate each of these cases, the following example looks at a CU interviewed in April whose reference person is 60 years old at the time of interview and where CU income from wages and salaries over the previous 12 months is \$48,000.

FMLY		UCC	ITAB		MONTH
VARIABLE	AMOUNT		AMOUNT		
FSALARYX	\$48,000	900000	\$4,000		JAN
		900000	\$4,000		FEB
		900000	\$4,000		MAR
AGE_REF	60	980020	5		JAN
			5		FEB
			5		MAR

Users should be aware of these time period differences when using the data.

#### **d. *COMPARISONS WITH PUBLISHED CE DATA***

The mean values for some income and expenditure items which appear in CE publications are different than those derived from the Interview public-use microdata because some variables are topcoded or suppressed on the public-use files, but are not so treated on BLS's own data base in producing published data. (For detailed topcoding information, see Section IV. TOPCODING AND OTHER NONDISCLOSURE REQUIREMENTS.)

## **2. ESTIMATION OF UNWEIGHTED STATISTICS**

### **a. *AGGREGATE STATISTICS***

To compute unweighted aggregate expenditures from data on the MTAB files, one would sum the value of the COST field for MTAB records of interest. These records could be selected on the basis of factors such as item category, month or year of occurrence, or characteristics of the CU or its members. While MTAB is a monthly file, there is no summation done at the monthly level for each CU for expenditures with similar UCC and gift characteristics. Thus one may find multiple MTAB records with identical characteristics including COST, if the CU reported the expenditures as discrete purchases. A similar approach can be applied to estimate aggregate income from data on the ITAB files, summing the VALUE field on the appropriate records.

Certain MTAB and ITAB item categories are collected only in the 5th interview. Therefore, the data are reported by only one-fourth of the sample at any time. For some categories, the reported values have been multiplied by 4 to expand them to represent the total sample, while in other categories, this has not been done. When estimating for these UCCs, values should be multiplied by 4 for total sample representation. (See Sections III.F.3 MONTHLY EXPENDITURES (MTAB) FILE and III.F.4 INCOME (ITAB) FILE.)

The estimation of aggregates for FMLY and MEMB file variables is similar to that for MTAB and ITAB variables. To estimate aggregates from data on the FMLY file, one would sum the value of the desired variable field for FMLY records selected on the basis of, for example, other CU characteristic variables on the FMLY file, characteristics of CU members, expenditures made, and month or year of interview. Aggregates for MEMB file variables would be developed in a similar fashion.

The user must be careful in interpreting what the aggregate represents because of the time period differences between variables on different files. For example, summing the COST field of MTAB records representing purchases for a UCC that occurred in a specific month will yield an aggregate monthly expenditure for that UCC. However, summing the value of a FMLY file variable such as FSALARYX for all CUs interviewed in a specific month will yield an aggregate annual value for that variable.

In general, one can use an aggregate derived for a certain time period to extrapolate an aggregate estimate for a longer time period. A typical case is the estimation of annual aggregates based on an aggregate using less than 12 months of data. To do this, divide the number of months for which the estimate is desired (12) by the number of months of expenditure data being used and multiply the aggregate by that quotient.

## **b. MEANS**

There are two types of means that are customarily derived from CE data. The most common is the sample mean computed over all CUs. The other is the mean of those reporting computed over only those CUs actually reporting the item. The following sections look at each type of mean.

### **(i) SAMPLE MEANS**

Unweighted sample means are derived by computing an aggregate estimate for the desired item and dividing it by the sample size over the time period being estimated. Deriving an aggregate estimate has already been discussed; ascertaining the correct sample size is the next task.

The Interview survey is designed such that the CUs interviewed in each quarter represent one independent sample. Since there is one FMLY record for each sample CU, the national sample for the first quarter of 1997 is 5,094 CUs. (See Section III.B. RECORD COUNTS PER QUARTER.) The appropriate sample size for any time period will reflect the number of interviewed CUs eligible to report data over the period adjusted by the number of independent samples represented. As explained earlier, the major consideration is whether the desired estimate is a collection period estimate or a calendar period estimate.

To calculate the sample size for a collection period estimate, divide the total number of CUs interviewed by the quotient of the number of months in which these interviews occurred divided by 3. For example, one might wish to estimate the annual sample mean expenditure for men's shirts for all CUs interviewed in 1997. If one were to divide the aggregate expenditure on men's shirts from these interviews by the total number of CUs interviewed, one would get an annual sample mean about 1/4 as large as it should be, since the number of CUs interviewed represented four independent samples (one sample for each quarter of 1997). In fact, one would have derived the average quarterly sample mean rather than the annual sample mean. To get the annual sample mean, one would have to divide the total number of CUs interviewed by 4 (or 12 months divided by 3), thereby computing the average sample size over the year, and divide the aggregate by that amount.

As mentioned earlier, when one computes a calendar period estimate, the variable MO\_SCOPE is required to adjust the sample size for the difference in potential contribution among CUs. Since one independent sample of CUs is represented in each quarter, the sum of MO\_SCOPE for one quarter can be up to 3 times the independent sample (if MO\_SCOPE = 3 for every CU interviewed in the quarter, the sum of MO\_SCOPE would be equal 3 times the independent sample). To calculate the sample size for a calendar period estimate, sum MO\_SCOPE for the appropriate CUs and divide by 3. Note that this makes sense in those instances where MO\_SCOPE does not equal 3. Referring to the example where MO\_SCOPE was introduced, we can see that summing MO\_SCOPE for CUs interviewed in the second quarter of the year (QINTRVMO = 4-6) would yield approximately one independent sample as CUs interviewed in June would be counted twice while CUs interviewed in April would not be counted. Dividing this amount by 3 would yield a sample size of 1/3 the independent sample. Keep in mind that only 1/3 of the expenditures reported in those interviews occurred within the time period of the aggregate being estimated. Only April data from May interviews and April-May data from June interviews would be included in the aggregate.

One can see how the computation of sample size is affected when one calculates the commonly-used annual calendar period estimate. A 1997 estimate would be based on data from interviews over five quarters. MO\_SCOPE would take on the following values:

		Interview Month and Year								
		1997			1997					
		<u>Jan</u>	<u>Feb</u>	<u>Mar</u>	<u>Apr</u>	<u>May</u>	<u>Jun</u>	<u>Jul</u>	<u>Aug</u>	<u>Sep</u>
MO_SCOPE		0	1	2	3	3	3	3	3	3
		1997				1998			1998	
		<u>Oct</u>	<u>Nov</u>	<u>Dec</u>	<u>Jan</u>	<u>Feb</u>	<u>Mar</u>			
MO_SCOPE		3	3	3	3	2	1			

Summing MO\_SCOPE for each of the five quarters and dividing by 3 would yield a value of 1/3 the independent sample for the first quarter of 1997, 2/3 the independent sample for the first quarter of 1998, and one independent sample for the second, third, and fourth quarters of 1997. Summed over the five quarters, this represents 4 independent samples, so the result should be divided by 4 to get the correct sample size of one average independent sample. Thus, the general rule in computing sample size for deriving an annual calendar period estimate is to sum MO\_SCOPE over the five quarters and divide by 12.

## (ii) MEANS OF THOSE REPORTING

The only difference between estimating a mean-of-those-reporting and estimating a sample mean is in selecting the appropriate CUs to use in the computation. The CUs to be used depend on the objective of the analysis. In deriving a sample mean, all sample units interviewed over the time period covered are included in the computation of sample size whether or not they reported the item being estimated. In computing a mean of those reporting, only those CUs reporting the desired item would be included. The aggregate estimate used in the numerator is the same in either case. The adjustments made for MO\_SCOPE and the fact that each quarter represents one independent sample would apply in this case as well. It should be noted that means of those reporting are not U.S. population estimates. They cannot be used to calculate total expenditures or expenditure shares for the U.S. population. They are useful only at the computed level.

## 3. ESTIMATION OF WEIGHTED STATISTICS

By applying weights when computing aggregates or means, one transforms the results from sample estimates to population estimates. There are 45 weight variables on the FMLY file, WTREP01-WTREP44 and FINLWT21. All the WTREP variables are half-sample replicate weights that should be used in variance computation. Use FINLWT21 to estimate weighted statistics for the population of CUs.

Users should follow the procedures for estimating unweighted statistics described above. When estimating weighted aggregates, the desired cost or value field should be multiplied by FINLWT21 at the CU level before summing across all appropriate records. In determining the proper sample size when computing collection period means, divide the sum of FINLWT21 for the CUs interviewed by the quotient of the number of months in which these interviews occurred divided by 3. Where calendar period means are to be estimated, multiply MO\_SCOPE by FINLWT21 for each CU prior to summing and dividing by 3.

## B. DESCRIPTION OF FORMULAS

Expenditure items will be referred to in these descriptions, but income items can be handled similarly except where otherwise stated.

### Definition of Terms:

Let

- $S$  = all CUs in the subpopulation of interest
- $x$  = item(s) of interest
- $q$  = number of months for which estimate is desired
- $m$  = number of months of interviews whose expenditures are to be used in calculating the estimate (collection period estimate)
- $r$  = number of months in which expenditures were made to be used in calculating the estimate (calendar period estimate)
- $j$  = individual CU in subpopulation  $S$
- $t$  = month of expenditure
- $i$  = month of interview
- $MSC$  = MO\_SCOPE value

Then

- $E_{j,x,i}$  = 3-month expenditure by CU $_j$  on item  $x$  reported at month  $i$  interview
- $E_{j,x,t}$  = monthly expenditure by CU $_j$  on item  $x$  made during month  $t$
- $W_{j,i,F21}$  = weight assigned to CU $_j$  for interview at month  $i$
- $W_{j,t,F21}$  = weight assigned to CU $_j$  for interview where CU $_j$  makes expenditure during month  $t$

The F21 denotes FINLWT21, which is used for population estimates.

## **1. AGGREGATE EXPENDITURE ESTIMATES (UNWEIGHTED)**

An estimate of unweighted aggregate expenditures for a collection period can be expressed as:

${}_{UK}X_{(S,x)(q,m)}$  = an unweighted collection (*UK*) period estimate of aggregate expenditures ( $X$ ) by CUs in subpopulation  $S$ , indexed from  $j = 1$  through  $k$ , on item  $x$  over  $q$  months of interviews, where data collected over  $m$  months of interviews are used.

or

$${}_{UK}X_{(S,x)(q,m)} = \left(\frac{q}{m}\right) \sum_{i=1}^m \left( \sum_{j=1}^k E_{x,j} \right)_i$$

An estimate of unweighted aggregate expenditures for a calendar period can be expressed as:

${}_{UC}X_{(S,x)(q,r)}$  = an unweighted calendar (*UC*) period estimate of aggregate expenditures ( $X$ ) by CUs in subpopulation  $S$ , indexed from  $j = 1$  through  $k$ , on item  $x$  over  $q$  months, where expenditures made over  $r$  months are used.

or

$${}_{UC}X_{(S,x)(q,r)} = \left(\frac{q}{r}\right) \sum_{t=1}^r \left( \sum_{j=1}^k E_{x,j} \right)_t$$

## **2. SAMPLE MEAN EXPENDITURE ESTIMATES (UNWEIGHTED)**

An estimate of an unweighted mean expenditure for a collection period can be expressed as:

$_{UK} \bar{X}_{(S,x)(q,m)}$  = an unweighted collection period estimate of the mean expenditure by CUs in subpopulation  $S$  on item  $x$  over a period of  $q$  months, where data collected over  $m$  months of interviews are used.

or

$$_{UK} \bar{X}_{(S,x)(q,m)} = \left( \frac{q}{m} \right) \frac{_{UK} X_{(S,x)(q,m)}}{\frac{\sum_{i=1}^m \left( \sum_{j=1}^k S_j \right)_i}{\left( \frac{m}{3} \right)}}$$

An estimate of an unweighted mean expenditure for a calendar period can be expressed as:

$_{UC} \bar{X}_{(S,x)(q,r)}$  = an unweighted calendar period estimate of the mean expenditure by CUs in subpopulation  $S$  on item  $x$  over a period of  $q$  months, where expenditures made over  $r$  months are used.

or

$$_{UC} \bar{X}_{(S,x)(q,r)} = \left( \frac{q}{r} \right) \frac{_{UC} X_{(S,x)(q,r)}}{\frac{\sum_{t=1}^{r+3} \left( MSC \sum_{j=1}^k S_j \right)_t}{r}}$$

Note: For  $t=1$ ,  $MO\_SCOPE (MSC) = 0$ , since CUs interviewed in the first month for which the estimate is to be generated report expenditures outside the estimate period, i.e., in the previous quarter, month, etc. For  $t=(r+3)$ ,  $MO\_SCOPE = 1$  since only 1 month's worth of expenditures have a chance to contribute to the calendar period of  $r$  months.

### 3. **AGGREGATE EXPENDITURE ESTIMATES (WEIGHTED)**

An estimate of weighted aggregate expenditures for a collection period can be expressed as:

$_{WK} X_{(S,x)(q,m)}$  = a weighted collection ( $WK$ ) period estimate of aggregate expenditures by CUs in subpopulation  $S$  on item  $x$  over a period of  $q$  months, where data collected over  $m$  months of interviews are used.

or

$$_{WK} X_{(S,x)(q,m)} = \left( \frac{q}{m} \right) \sum_{i=1}^m \left( \sum_{j=1}^k (W_{j,F21} E_{x,j}) \right)_i$$

An estimate of weighted aggregate expenditures for a calendar period can be expressed as:

${}_{WC}X_{(S,x)(q,r)}$  = a weighted calendar (WC) period estimate of aggregate expenditures by CUs in subpopulation  $S$  on item  $x$  over  $q$  months, where expenditures made over  $r$  months are used.

or

$${}_{WC}X_{(S,x)(q,r)} = \left( \frac{q}{r} \right) \sum_{t=1}^r \left( \sum_{j=1}^k (W_{j,F21} E_{x,j}) \right)_t$$

#### 4. SAMPLE MEAN EXPENDITURE ESTIMATES (WEIGHTED)

An estimate of a weighted mean expenditure for a collection period can be expressed as:

${}_{WK}\bar{X}_{(S,x)(q,m)}$  = a weighted collection (WK) period estimate of the mean expenditure by CUs in subpopulation  $S$  on item  $x$  over a period of  $q$  months, where data collected over  $m$  months of interviews are used.

or

$${}_{WK}\bar{X}_{(S,x)(q,m)} = \left( \frac{q}{m} \right) \frac{{}_{WK}X_{(S,x)(q,m)}}{\frac{\sum_{i=1}^m \left( \sum_{j=1}^k W_{j,F21} \right)_i}{\left( \frac{m}{3} \right)}}$$

An estimate of a weighted mean expenditure for a calendar period can be expressed as:

${}_{WC}\bar{X}_{(S,x)(q,r)}$  = a weighted calendar (WC) period estimate of the mean expenditure by CUs in subpopulation  $S$  on item  $x$  over a period of  $q$  months, where expenditures made over  $r$  months are used.

or

$${}_{WC}\bar{X}_{(S,x)(q,r)} = \left( \frac{q}{r} \right) \frac{{}_{WC}X_{(S,x)(q,r)}}{\frac{\sum_{t=1}^{r+3} \left[ (MSC) \left( \sum_{j=1}^k W_{j,F21} \right) \right]_t}{r}}$$

Note: For  $t=1$ , MO\_SCOPE (MSC) = 0, since CUs interviewed in the first month for which the estimate is to be generated report expenditures outside the estimate period, i.e., in the previous quarter, month, etc. For  $t=(r+3)$ , MO\_SCOPE = 1 since only 1 month's worth of expenditures have a chance to contribute to the calendar period of  $r$  months.

## **VI. RELIABILITY STATEMENT**

### **A. DESCRIPTION OF SAMPLING AND NONSAMPLING ERRORS**

Sample surveys are subject to two types of errors, sampling and non-sampling. Sampling errors occur because observations are not taken from the entire population. The standard error, which is the accepted measure for sampling error, is an estimate of the difference between the sample data and the data that would have been obtained from a complete census. The sample estimate and its estimated standard error enable one to construct confidence intervals.

Assuming the normal distribution applies to the means of expenditures, the following statements can be made:

- 1) The chances that an estimate from a given sample would differ from a complete census figure by less than one standard error are approximately 68 out of 100.
- 2) The chances that the difference would be less than 1.6 times the standard error are approximately 90 out of 100.
- 3) The chances that the difference would be less than two times the standard error are approximately 95 out of 100.

Nonsampling errors can be attributed to many sources, such as definitional difficulties, differences in the interpretation of questions, inability or unwillingness of the respondent to provide correct information, mistakes in recording or coding the data obtained, and other errors of collection, response, processing, coverage, and estimation of missing data. The full extent of the nonsampling error is unknown. Estimates using a small number of observations are less reliable. A small amount of nonsampling error can cause a small difference to appear significant even when it is not. It is probable that the levels of estimated expenditures obtained in the Interview survey are generally lower than the "true" level due to the above factors.

### **B. ESTIMATING SAMPLING ERROR**

#### **1. VARIANCE ESTIMATION**

Variances can be estimated in many ways. The method illustrated below (a pseudo replication technique) is chosen because it is accurate and simple to understand. The basic idea is to construct several artificial "subsamples" from the original sample data such that the variance information of the original data is preserved in the subsamples. The subsamples (or pseudo replicates) can then be used to approximate variances for the estimates. Forty-four separate subsamples can be extracted from the data base using the replicate weight variables, WTREP01-WTREP44, associated with each CU. Note that only half of the CU's are assigned to each of the 44 replicates. The replicate weight variable contains a value greater than 0 for CU's assigned to that replicate. A value of missing is assigned to the weight variable for those CU's not included in a particular replicate.

The notation for the weighted collection period and calendar period estimates of aggregate expenditures in Section V.B.3 AGGREGATE EXPENDITURE ESTIMATES (WEIGHTED) does not explicitly identify the replicate as a variable because to calculate an aggregate (or mean) only FINLWT21 is used.

An estimate for the variance of an aggregate or mean estimate can be computed by generating 44 separate estimates using the 44 replicate weights and employing the standard formula for computing sample variance. To illustrate the estimation of variance, the notation must first be expanded to include the replicates explicitly.

Expenditure items will be referred to in these descriptions, but income items can be handled similarly except where otherwise stated.

Let the subscript “a” represent one of the 44 sets of replicate weights on the FMLY files. Following the earlier notation in Section V.B., we have.

$AK X_{(S,x)(q,m),a}$  = a collection period estimate of aggregate expenditures by CU's in subpopulation S on item x over a period of q months, using data collected over m months of interviews, calculated using the weights of the a<sup>th</sup> replicate

and,

$AK \bar{X}_{(S,x)(q,m),a}$  = a collection period estimate of the mean expenditure by CU's in subpopulation S on item x over a period of q months, using data collected over m months of interviews, calculated using the weights of the a<sup>th</sup> replicate

Note that an estimate using any one of the first 44 replicate weights uses only part of the expenditure data; in general:  $AK X_{(S,x)(q,m),1}, \dots, AK X_{(S,x)(q,m),44} \neq WK X_{(S,x)(q,m)}$

Using standard variance formula, the variance of aggregate expenditures can be estimated as follows:

$$V\left(WK X_{(S,x)(q,m)}\right) = \frac{1}{44} \sum_{a=1}^{44} \left( AK X_{(S,x)(q,m),a} - WK X_{(S,x)(q,m)} \right)^2$$

Similarly, estimates for the variances of  $WK \bar{X}_{(S,x)(q,m)}$  can be given as:

$$V\left(WK \bar{X}_{(S,x)(q,m)}\right) = \frac{1}{44} \sum_{a=1}^{44} \left( AK \bar{X}_{(S,x)(q,m),a} - WK \bar{X}_{(S,x)(q,m)} \right)^2$$

## 2. STANDARD ERROR OF THE MEAN

The standard error of the mean,  $S.E.(\bar{X})$ , is used to obtain confidence intervals that evaluate how close the estimate may be to the true population mean.  $S.E.(\bar{X})$  is defined as the square root of the variance of the mean. For example, the weighted calendar period mean expenditure for total food by complete income reporters in 1997 was \$4,874.18. The standard error for this estimate is \$44.55. A 95 percent confidence interval can be constructed around this estimate, bounded by values two times the standard error less than and greater than the estimate, that is, from \$4,785.08 to \$4,963.28. We could conclude with 95 percent confidence that the true population mean expenditure for food for total complete income reporters in 1997 lies within the interval \$4,785.08 to \$4,963.28.

### 3. STANDARD ERROR OF THE DIFFERENCE BETWEEN TWO MEANS

Standard errors may also be used to perform hypothesis testing, a procedure that evaluates population parameters using sample estimates. The most common types of hypotheses are: 1) the population parameters are identical, and 2) they are different.

For example, the 1997 mean expenditure for apparel and services for complete income reporters in the second income quintile was \$828.78 and for complete income reporters in the third income quintile was \$1,146.34. The apparent difference between the two mean expenditures is \$1,146.34 – \$828.78 = \$317.56. The standard error on the estimate of \$828.78 is \$24.95 and the estimated standard error for \$1,146.34 is \$34.79.

The standard error of a difference is approximately equal to

$$S.E.(\bar{X}_1, \bar{X}_2) = \sqrt{V(\bar{X}_1) + V(\bar{X}_2)} \quad (1)$$

where

$$V(\bar{X}_i) = (S.E.(\bar{X}_i))^2$$

This assumes the two sample means,  $\bar{X}_1$  and  $\bar{X}_2$ , are disjoint subsets of the population. Hence the standard error of the difference in apparel and services expenditures between the second and third income quintile groups of complete income reporters is about

$$\sqrt{(34.79)^2 + (24.95)^2} = 42.81 \quad (2)$$

This means that the 95 percent confidence interval around the difference is from \$231.94 to \$403.18. Since this interval does not include zero, we can conclude with 95 percent confidence that the mean apparel and services expenditures for the third income quintile group of complete income reporters is greater than the mean apparel and services expenditures for the second income quintile group.

Analyses of the difference between two estimates can also be performed on nondisjoint sets of population, where one is a subset of the other. The formula for computing the standard error of the difference between two nondisjoint estimates is

$$S.E.(\bar{X}_1, \bar{X}_2) = \sqrt{V(\bar{X}_1) + V(\bar{X}_2) - 2r(V(\bar{X}_1) * V(\bar{X}_2))} \quad (3)$$

where

$$V(\bar{X}_i) = (S.E.(\bar{X}_i))^2$$

and where  $r$  is the correlation coefficient between  $\bar{X}_1$  and  $\bar{X}_2$ . The correlation coefficient is generally no greater than 0.2 for CE estimates.

## VII. MICRODATA VERIFICATION AND ESTIMATION METHODOLOGY

This section is designed to help users become familiar with the microdata files. The following program gives users a benchmark to verify that their copy of the CD-ROM contains valid data, illustrates the methodology CE uses in producing publication tables, and offers an example of coding to access the data and produce a sample table. The program is written in SAS and utilizes the ASCII data sets available on this CD-ROM. A program written in SAS but utilizing the SAS data sets is also present on the CD-ROM but will not be referenced here. Refer to the table following the program to check output. (Note: CE data published by BLS may not match some values estimated using the microdata due to topcoding of data and CE publication programming methodology.) All variables and ranges referred to in the program are described in detail in Section III.F. DETAILED VARIABLE DESCRIPTIONS in this documentation.

This program produces a table of selected expenditures by income class of the CU. The first section of the program extracts the relevant variables from the FMLY files, while the second section extracts the expenditure and income data from the MTAB and ITAB files. These three data sets are then used along with the AGG and LABEL processing files to construct the sample table output. This output is the product of two SAS arrays. The values in one array are divided by the value in the other array to obtain weighted mean expenditures. The base, or denominator, for the division is a vector consisting of the weighted total population for the U.S. and selected income class categories. The numerator is a matrix of aggregate weighted costs for each line item in the table for the total U.S. population and each income class category.

It should be emphasized that this program has been written solely for the verification of the microdata and as an illustration of the CE estimation methodology. It should not be used for any other purpose.

Note: This program processes large amounts of data. If you are using a PC with limited capabilities it may be necessary to run this program in sections.

NOTE: The infile FMLY4 is:

```
FILENAME=x:\intrvw97\fmlyi974.txt,  
RECFM=V,LRECL=3455
```

NOTE: 5609 records were read from the infile FMLY4.

The minimum record length was 3455.

The maximum record length was 3455.

NOTE: The data set WORK.FMLY4 has 5609 observations  
and 4 variables.

```
57  proc sort; by newid;
```

```
58
```

NOTE: The data set WORK.FMLY4 has 5609 observations  
and 4 variables.

```
59 data fmly5;
```

```
60  infile fmly5 lrecl=3461;
```

```
61  input @1 newid 8. @331 finlwt21 11.3 @663 qintrvmo  
$2.
```

```
62      @3324 inclass $2.;
```

NOTE: The infile FMLY5 is:

```
FILENAME=x:\intrvw97\fmlyi981.txt,  
RECFM=V,LRECL=3461
```

NOTE: 5614 records were read from the infile FMLY5.

The minimum record length was 3461.

The maximum record length was 3461.

NOTE: The data set WORK.FMLY5 has 5614 observations  
and 4 variables.

```
63  proc sort; by newid;
```

```
64
```

```
65
```

NOTE: The data set WORK.FMLY5 has 5614 observations  
and 4 variables.

```
66 data fmlyall(drop=qintrvmo );
```

```
67  set fmly1(in=in1) fmly2 fmly3 fmly4 fmly5(in=in5);
```

```
68  by newid;
```

Lines 66-68 bring each of the 5 quarters  
of fmly data sets together.

```
69  if in1 then mo_scope=qintrvmo-1;
```

```
70  else if in5 then mo_scope=4-qintrvmo;
```

```
71  else mo_scope=3;
```

```
72  uspop = finlwt21 * mo_scope/12;
```

Lines 69-71 create the variable  
mo\_scope. Mo\_scope is used to  
calculate calendar year, as opposed to  
collection year, estimates. It is used in  
conjunction with finwt21 to determine  
uspop. Uspop is the weight each family  
will be given to inflate the values they  
report to a national level. NOTE: More

NOTE: Character values have been converted to numeric  
values at the places given by: (Line):(Column).

```
69:25 70:32
```

The data set WORK.FMLYALL has 27797 observations and 5 variables.

information on mo\_scope can be found in the ESTIMATION PROCEDURES section of this documentation.

```
73  proc sort; by newid;
```

NOTE: The data set WORK.FMLYALL has 27797 observations and 5 variables.

```
74  proc datasets;  
75      delete fmly1 fmly2 fmly3 fmly4 fmly5;
```

Lines 74-75 delete from memory the data sets that are no longer necessary for processing.

NOTE: Deleting WORK.FMLY1 (memtype=DATA).  
NOTE: Deleting WORK.FMLY2 (memtype=DATA).  
NOTE: Deleting WORK.FMLY3 (memtype=DATA).  
NOTE: Deleting WORK.FMLY4 (memtype=DATA).  
NOTE: Deleting WORK.FMLY5 (memtype=DATA).

```
76  proc summary nway data = fmlyall;  
77      class inclass;  
78      var uspop;  
79      output out = newpop sum = popus;  
80
```

Lines 76-90 create the total population weights by income group that will be used as the denominator in calculating the average annual expenditures later in the program and prints them.

NOTE: The data set WORK.NEWPOP has 10 observations and 4 variables.

```
81  proc transpose data = newpop out = transpop prefix =  
pop;  
82      var popus;  
83  
84
```

Lines 81-82 transpose the newpop data set to match the format of the PUBRAY data set that it will be matched with later in the program.

NOTE: The data set WORK.TRANSPOP has 1 observations and 11 variables.

```
85  data subagg (drop = _name_);  
86      set transpop;  
87      pop1 = sum (of pop1-pop10);  
88      popc = sum (of pop1-pop9);
```

Lines 85-88 take the transposed data set and calculate pop1, the all consumer units population, and popc, the all complete income reporters population.

NOTE: The data set WORK.SUBAGG has 1 observations and 12 variables.

```
89  proc print data=subagg;  
90      title "Population Counts for 19&y";  
91

166   if refyr="19&y";
```

NOTE: The infile ITAB5 is:  
FILENAME=x\intrvw97\itabi981.txt,  
RECFM=V,LRECL=35

NOTE: 292374 records were read from the infile ITAB5.

The minimum record length was 35.

The maximum record length was 35.

NOTE: The data set WORK.ITAB5 has 194866 observations and 4 variables.

```
167   proc sort; by newid;
168
```

NOTE: The data set WORK.ITAB5 has 194866 observations and 4 variables.

```
169 data itaball(drop=refyr rename=(value=cost));
170   set itab1 itab2 itab3 itab4 itab5;
171   by newid;
```

NOTE: The data set WORK.ITABALL has 1160043 observations and 3 variables.

```
172   proc sort; by newid;
```

NOTE: The data set WORK.ITABALL has 1160043 observations and 3 variables.

```
173   proc datasets;
174       delete itab1 itab2 itab3 itab4 itab5;
```

NOTE: Deleting WORK.ITAB1 (memtype=DATA).

NOTE: Deleting WORK.ITAB2 (memtype=DATA).

Lines 169-171 bring all 5 quarters of itab data sets together. The variable value is renamed cost so that it can be merged with the mtab data sets later in the program.

Lines 173-174 delete from memory the data sets that are no longer necessary for processing.

NOTE: Deleting WORK.ITAB3 (memtype=DATA).  
NOTE: Deleting WORK.ITAB4 (memtype=DATA).  
NOTE: Deleting WORK.ITAB5 (memtype=DATA).

```
175 data expend ;  
176   set mtaball itaball;  
177   by newid;  
178   if ucc='710110' then cost=cost*4;
```

NOTE: The data set WORK.EXPEND has 3203514 observations and 3 variables.

Lines 175-178 pull the mtaball and itaball data sets together. One ucc must be adjusted because only one-fourth of all consumer units interviewed in a quarter are asked this question (those in the 5<sup>th</sup> interview).

```
179   proc sort; by newid;
```

NOTE: The data set WORK.EXPEND has 3203514 observations and 3 variables.

```
180   proc datasets;  
181       delete mtaball itaball;  
182
```

Lines 180-181 delete from memory the data sets no longer needed for processing.

NOTE: Deleting WORK.MTABALL (memtype=DATA).  
NOTE: Deleting WORK.ITABALL (memtype=DATA).

```
183 data pubfile;  
184   merge fmlyall (in = infam drop=mo_scope)  
185       expend (in = inexp)  
186       ;  
187   by newid ;  
188   if cost='.' then cost=0;  
189   wcost = finlwt21 * cost;  
190   if not inexp then delete;  
191
```

Lines 183-190 merge the fmlyall and expend data sets together and check the cost variable to make sure there are no missing values.

Line 189 weights the cost variable up to the population level that the consumer unit represents.

NOTE: Character values have been converted to numeric values at the places given by: (Line):(Column).

188:13

NOTE: The data set WORK.PUBFILE has 3203514 observations and 7 variables.

```
192   proc summary nway data = pubfile;  
193       class ucc inclass;  
194       var wcost;  
195       output out = aggcst sum = wcost;
```

Lines 192-195 sum the weighted costs for the consumer units for each ucc by income group and outputs this as a new data set called aggcst.

NOTE: The data set WORK.AGGCST has 6037 observations and 5 variables.

```
196   proc datasets;  
197       delete expend;
```

Lines 196-197 delete from memory any data sets that are no longer needed for processing.  
NOTE: Deleting WORK.EXPEND (memtype=DATA).

```
198 data aggray (drop = inclass _type_ _freq_ wcost);
199 set aggcost;
200 by ucc ;
201   array trncost grp1-grp10;
202   retain grp1-grp10;
203   if first.ucc then do over trncost;
204     trncost = 0;
205   end;
206   _l_=inclass;
207   trncost=wcost;
208   if last.ucc then output;
209
```

Lines 198-208 create the variables grp1-grp10 that will designate the income groups and then places the weighted cost, or expenditure, data into the appropriate new variable.

NOTE: Character values have been converted to numeric values at the places given by: (Line):(Column).

206:13

NOTE: The data set WORK.AGGRAY has 670 observations and 11 variables.

```
210 data agfile;
211   infile agg lrecl=20;
212   input @3 ucc $6. @10 gift $1.
213         @15 line $6.;
214   if gift='2';
```

Lines 210-214 pull in the file that dictates how each ucc will be summed for aggregation.

NOTE: The infile AGG is:  
FILENAME=x:\intrvw97\aggi97.txt,  
RECFM=V,LRECL=256

NOTE: 4882 records were read from the infile AGG.

The minimum record length was 20.

The maximum record length was 21.

NOTE: The data set WORK.AGFILE has 2197 observations and 3 variables.

```
215   proc sort data = agfile;
216   by ucc ;
217
```

NOTE: The data set WORK.AGFILE has 2197 observations and 3 variables.

```
218 data pubray ;
219   merge aggray (in = inray)
220         agfile (in = inagg);
221   by ucc;
222   if inray and inagg;
223
```

Lines 218-222 merge the data set containing the weighted costs and the agfile. The agfile will give all costs a code called line that will be used for aggregation.

NOTE: The data set WORK.PUBRAY has 1988 observations and 13 variables.

```
224   proc summary nway data = pubray;
225       class line;
226       var grp1-grp10;
227       output out = aggsum sum = ;
228
229
```

Lines 224-227 sum the weighted costs for each income group (grp1-grp10) by line and output this into a new data set called aggsum.

NOTE: The data set WORK.AGGSUM has 230 observations and 13 variables.

```
230 data cstpop1 (drop = _type_ _freq_ popt popc pop1-
pop10);
231   if _n_ = 1 then set subagg;
232   set aggsum;
233   grpt = sum (of grp1-grp10);
234   grpc = sum (of grp1-grp9);
235   array ex grpt grpc grp1-grp10;
236   array wt popt popc pop1-pop10;
237   do over ex;
238       ex = ex/wt;
239   end;
240
```

Lines 230-239 create two arrays. One array is a vector from the subagg data set that contains the population counts (popt, popc, pop1-pop10). The other is a matrix of the weighted costs by income group. The costs are divided by the population counts.

NOTE: The data set WORK.CSTPOP1 has 230 observations and 13 variables.

NOTE: The DATA statement used 0.48 seconds.

```
241 data numcus (rename=(popt=grpt popc=grpc
pop1=grp1 pop2=grp2
242       pop3=grp3 pop4=grp4 pop5=grp5
pop6=grp6
243       pop7=grp7 pop8=grp8 pop9=grp9
pop10=grp10));
244   set subagg;
245   line='000000';
246
```

Lines 241-249 give the population counts a line value so that they can be printed as part of the final output, and then brings them together with the summed cost data set that was calculated with the arrays.

NOTE: The data set WORK.NUMCUS has 1 observations and 13 variables.

```
247 data cstpop;
248   set numcus cstpop1;
249   by line;
250
```

NOTE: The data set WORK.CSTPOP has 230 observations and 13 variables.

```

251 data addlab;
252     infile labls lrecl=57;
253     input @1 line $6. @8 title $char50.;
254

```

Lines 251-254 pull in the label file that will put titles on the final output.

NOTE: The infile LABLS is:  
 FILENAME=x:\intrvw97\labeli97.txt,  
 RECFM=V,LRECL=256

NOTE: 114 records were read from the infile LABLS.  
 The minimum record length was 57.  
 The maximum record length was 57.

NOTE: The data set WORK.ADDLAB has 114 observations and 2 variables.

```

255 data pubtab (drop = line);
256     merge cstpop (in = inline)
257         addlab (in = inlabl);
258     by line;
259     if not inlabl then delete;
260

```

Lines 255-283 merge the summed cost data set with the titles for printing. The output is formatted and the income groups are given labels. Note that not all groups are printed – the incomplete reporters (grp10) and all consumer units (grpt).

NOTE: The data set WORK.PUBTAB has 114 observations and 13 variables.

```

261     proc print split='*' uniform;
262     label
263     grpt='    All* Consumer*   Units*'
264     grpc='    Total* Complete*Reporting*'
265     grp1='    Less*   Than*   $5,000*'
266     grp2='    $5,000*   To*   $9,999*'
267     grp3='    $10,000*  To*   $14,999*'
268     grp4='    $15,000*  To*   $19,999*'

## B. OUTPUT

The following observation shows the contents of the subagg data set created in lines 85-88. It represents the weighted number of CUs in each INCLASS category as well as for the total population and the population of complete income reporters.

Population Counts for 1997												
OBS	POP1	POP2	POP3	POP4	POP5	POP6	POP7	POP8	POP9	POP10	POPT	POPC
1	4177683.31	8903862.53	9096128.75	7423937.67	12414644.96	10391511.58	7948596.95	11929896.92	12704845.65	20584710.47	105575818.8	84991108.33

The table that follows represents printed output of the PUBTAB data set.

## VIII. DESCRIPTION OF THE SURVEY

The CE program consists of two separate components, each with its own questionnaire and independent sample:

1) An Interview panel survey in which each CU in the sample is interviewed once every 3 months over five consecutive quarters to obtain a year's worth of data. New panels are initiated every month of the year.

2) A Diary or recordkeeping survey completed by the sample CUs for two consecutive 1-week periods; the sample is surveyed across a 12-month period.

Data are collected by the Bureau of the Census under contract with BLS. All data collected in both surveys are subject to Bureau of the Census confidentiality requirements, which prevent the disclosure of any CU member's identity.

The quarterly Interview survey is designed to collect data on major items of expense which respondents can be expected to recall for 3 months or longer. In practice, the Interview survey collects detailed data on an estimated 60 to 70 percent of total household expenditures. In addition, global estimates are obtained for food and other selected items. These global estimates account for an additional 20 to 25 percent of total expenditures. The Interview survey does not collect expenses for housekeeping supplies, personal care products, and nonprescription drugs, which contribute about 5 to 15 percent of total expenditures. Thus, up to 95 percent of total expenditures are covered in the Interview survey. Household characteristics, income, and financial data are also collected. At BLS, each quarter of data is processed independently from other quarters. Thus the annual estimates published by BLS are not dependent on the participation of a CU for the full five interviews.

The initial interview collects demographic and family characteristics data on a Control Card. These pertain to age, sex, race, marital status, education, and CU relationship for each CU member. This information is updated at each subsequent interview. Expenditures are for the month prior to the interview. They are used along with the inventory information for bounding purposes solely, that is, to prevent the reporting of expenditures from an indefinite past period. Expenditure data from the first interview are not on these files since they are not included in expenditure estimation.

The second through fifth interviews use uniform questionnaires to collect expenditure information from the previous three months. Income information, such as wage, salary, unemployment compensation, child support, and alimony, as well as information on the employment of each CU member age 14 and over, are collected in the second and fifth interviews only.

Income data and employment information collected in the second interview are carried over to the third and fourth interviews. For new CU members and CU members who started work since the previous interview, wage, salary, and other information on employment are collected in the third and fourth interviews. In the fifth interview, a supplement is used to collect information on asset values and changes in balances of assets and liabilities. These data, along with other household characteristics information, permit users to classify sample units for research purposes and allow BLS to adjust population weights for CUs who do not cooperate in the survey.

Each quarter, 20 percent of the sample are new households introduced for the first time. They replace one-fifth of the sample that completed its final interview in the previous quarter. This rotating procedure with overlap is designed to provide more efficient data collection. CUs that move away from their sample address between interviews are dropped from the survey. New CUs that move into the sample address are screened for eligibility and included in the survey. Students living in college- or university-regulated housing report their own expenditures directly, while at school, rather than being considered part of their parents' household.

## **IX. DATA COLLECTION AND PROCESSING**

In addition to its data collection duties, the Bureau of the Census is responsible for field editing and coding, consistency checking, quality control, and data transmittal to BLS. BLS performs additional review and editing procedures in preparing the data for publication and release.

### **A. BUREAU OF THE CENSUS ACTIVITIES**

Data collection activities have been conducted by the Census Bureau on a continuing basis since October 1979. Due to differences in format and design, the Interview survey and the Diary survey data are collected and processed separately.

Preliminary Interview survey data processing carried out by the Census Bureau includes clerical data edits and adjustments. Upon completion by the interviewers, the Interview questionnaires are returned to the regional offices, where codes are applied to identify demographic characteristics, expenditures, income and assets, and other items such as make and model of automobile and trip destination.

After clerical processing, the data are keyed and transmitted to the Census Processing Center in Washington, D.C., where they pass through a detailed preliminary computer edit. Information on missing sections of questionnaires, inconsistencies, and errors are transmitted back to the regional offices for reconciliation by the field staff through office review or interviewer follow-up. Corrections are keyed and transmitted to Washington, and again cycled through the preliminary computer edit. This continues until errors identified by the preliminary edit no longer appear.

Once the preliminary edit of the current quarter's questionnaire is complete, they are sent to the Data Preparation Division in Jeffersonville, Indiana. Prior to microfilming and storage, selected entries from these questionnaires are transcribed to the next quarter's questionnaires to prevent the recording of duplicate reports by respondents.

The data then undergo a series of computer edits that identify and correct irregularities and inconsistencies. Other adjustments eliminate business and reimbursed expenses, apply appropriate sales taxes, and derive CU weights based on BLS specifications. In addition, demographic and work experience items (except income) are imputed when missing or invalid. All data changes and imputations are identified with flags on the Interview data base. Final tapes of the edited and coded data are then transmitted to BLS on a monthly basis.

### **B. BUREAU OF LABOR STATISTICS ACTIVITIES**

Upon receipt of the data from the Bureau of the Census, BLS conducts an extensive review to ensure that severe data aberrations are corrected. The review takes place in several stages: a review of counts, weighted means, and unweighted means by region; a review of family relationship coding inconsistencies; a review of selected extreme values for expenditure and income categories; and a verification of the various data transformations.

Cases of extreme data values are investigated by reviewing questionnaires on microfilm. Errors discovered through this procedure are corrected prior to release of the data.

Two major types of data adjustment routines--imputation and allocation--are carried out to classify expenditures and improve estimates. Data imputation routines correct for missing or invalid entries. All fields except income and assets are subject to imputation. Allocation routines are applied when respondents provide insufficient expenditure detail to meet tabulation requirements. For example, reports of combined expenditures for fuels and utilities are allocated among gas, electricity, and other items in this group. While not strictly an allocation routine, another adjustment separates mortgage and vehicle loan payments into principal and interest components using associated data on the interest rate and term of the loan. Another adjustment is done to prepare the data for the production of calendar year estimates. Time adjustment routines are used to classify expenditures by month. Aggregation can then be done at a monthly level, permitting the production of monthly, quarterly, annual, and other interval estimates. To analyze the effects of these adjustments, tabulations are made before and after the data adjustments. At this point, processing activities are completed and the database is ready for use.

## **X. SAMPLING STATEMENT**

### **A. SURVEY SAMPLE DESIGN**

Samples for the CE are national probability samples of households designed to be representative of the total U. S. civilian population. Eligible population includes all civilian noninstitutional persons.

The first step in sampling is the selection of primary sampling units (PSUs), which consist of counties (or parts thereof) or groups of counties. The set of sample PSUs used for the 1997 and 1998 samples is composed of 105 areas. The design classifies the PSUs into four categories:

- 31 "A" certainty PSUs are Metropolitan Statistical Areas (MSA's) with a population greater than 1.5 million.
- 46 "B" PSUs, are medium-sized MSA's.
- 10 "C" PSUs are nonmetropolitan areas that are included in the CPI.
- 18 "D" PSUs are nonmetropolitan areas where only the urban population data will be included in the CPI.

The sampling frame (that is, the list from which housing units were chosen) for the 1997 and 1998 surveys is generated from the 1990 Census of Population 100-percent-detail file. The sampling frame is augmented by new construction permits and by techniques used to eliminate recognized deficiencies in census coverage. All Enumeration Districts (EDs) from the Census that fail to meet the criterion for good addresses for new construction, and all EDs in nonpermit-issuing areas are grouped into the area segment frame. Interviewers are then assigned to list these areas before a sample is drawn.

To the extent possible, an unclustered sample of units is selected within each PSU. This lack of clustering is desirable because the sample size of the Diary Survey is small relative to other surveys, while the intraclass correlations for expenditure characteristics are relatively large. This suggests that any clustering of the sample units could result in an unacceptable increase in the within-PSU variance and, as a result, the total variance.

The Interview Survey is a panel rotation survey. Each panel is interviewed for five consecutive quarters and then dropped from the survey. As one panel leaves the survey, a new panel is introduced. Approximately 20 percent of the addresses are new to the survey each month.

## B. COOPERATION LEVELS

The Interview Survey is a rotating panel survey in which approximately 7,000 sample units are contacted each calendar quarter. Allowing for bounding interviews and nonresponse (including vacancies), the number of participating sample units per quarter is targeted at approximately 5,000. Information on 1997 interview participation follows.

The response rate for the 1997 Interview Survey is 80.1% as shown below

Consumer units designated for the survey	Type B or C ineligible cases	<i>Eligible housing unit interviews</i>		
		Number of potential interviews	Type A nonresponse	Total respondent interviews
33,594	5,913	27,681	5,498	22,183

Type B or C cases are housing units that are vacant, nonexistent, or ineligible for interview. Type A nonresponses are housing units that the interviewers were unable to contact or the respondents refused to participate in the survey. The response rate stated above is based only on the eligible housing units (i.e., the designated sample cases less Type B and Type C ineligible cases).

## C. WEIGHTING

Each CU included in the CE represents a given number of CUs in the U.S. population, which is considered to be the universe. The translation of sample families into the universe of families is known as weighting. However, since the unit of analysis for the CE is a CU, the weighting is performed at the CU level. Several factors are involved in determining the weight for each CU for which an interview is obtained. There are four steps in the weighting procedure:

- 1) The basic weight is assigned to an address and is the inverse of the probability of selection of the housing unit.
- 2) A weight control factor is applied to each interview if subsampling is performed in the field.
- 3) A noninterview adjustment is made for units where data could not be collected from occupied housing units. The adjustment is performed as a function of region, housing tenure, family size and race.
- 4) A final adjustment is performed to adjust the sample estimates to national population controls derived from the Current Population Survey. The adjustments are made based on both the CU's member composition and the CU as a whole. The weight for the CU is adjusted for individuals within the CU to meet the controls for 14 age/race categories, 4 regions, and 4 region/urban categories. The CU weight is also adjusted to meet the control for total number of CUs and total number of CUs who own their living quarters. The weighting procedure uses an iterative process to ensure that the sample estimates meet all the population controls.

NOTE: The weight for a consumer unit (CU) can be different for each quarter in which the CU participates in the survey, as the CU may represent a different number of CUs with similar characteristics.

## **D. STATE IDENTIFIER**

Since the CE is not designed to produce state-level estimates, summing the CU weights by state will not yield state population totals. A CU's basic weight reflects its probability of selection among a group of primary sampling units of similar characteristics. For example, sample units in an urban nonmetropolitan area in California may represent similar areas in Wyoming and Nevada. Among other adjustments, CUs are post-stratified nationally by sex-age-race. For example, the weights of CUs containing a black male, age 16-24 in Alabama, Colorado, or New York, are all adjusted equivalently. Therefore, weighted population state totals will not match population totals calculated from other surveys that are designed to represent state data.

To summarize, the CE sample was not designed to produce precise estimates for individual states. Although state-level estimates that are unbiased in a repeated sampling sense can be calculated for various statistical measures, such as means and aggregates, their estimates will generally be subject to large variances. Additionally, a particular state population estimate from the CE sample may be far from the true state population.

## **XI.INTERPRETING THE DATA**

Several factors should be considered when interpreting the expenditure data. The average expenditure for an item may be considerably lower than the expenditure by those CUs that purchased the item. The less frequently an item is purchased, the greater the difference between the average for all CUs and the average of those purchasing. (See Section V.A.2.b.ii. for MEANS OF THOSE REPORTING.) Also, an individual CU may spend more or less than the average, depending on its particular characteristics. Factors such as income, age of family members, geographic location, taste and personal preference influence expenditures. Furthermore, even within groups with similar characteristics, the distribution of expenditures varies substantially.

Expenditures reported are the direct out-of-pocket expenditures. Indirect expenditures, which may be significant, may be reflected elsewhere. For example, rental contracts often include utilities. Renters with such contracts would record no direct expense for utilities, and therefore, appear to have lower utility expenses. Employers or insurance companies frequently pay other costs. CU with members whose employers pay for all or part of their health insurance or life insurance would have lower direct expenses for these items than those who pay the entire amount themselves. These points should be considered when relating reported averages to individual circumstances.

## **XII.APPENDIX 1 -- GLOSSARY**

### Population

The civilian noninstitutional population of the United States as well as that portion of the institutional population living in the following group quarters: Boarding houses, housing facilities for students and workers, staff units in hospitals and homes for the aged, infirm, or needy, permanent living quarters in hotels and motels, and mobile home parks. Urban population is defined as all persons living in a Metropolitan Statistical Area (MSA's) and in urbanized areas and urban places of 2,500 or more persons outside of MSA's. Urban, defined in this survey, includes the rural populations within MSA. The general concept of an MSA is one of a large population nucleus together with adjacent communities that have a high degree of economic and social integration with that nucleus. Rural

population is defined as all persons living outside of an MSA and within an area with less than 2,500 persons.

#### Consumer unit (CU)

A consumer unit comprises either: (1) all members of a particular household who are related by blood, marriage, adoption, or other legal arrangements; (2) a person living alone or sharing a household with others or living as a roomer in a private home or lodging house or in permanent living quarters in a hotel or motel, but who is financially independent; or (3) two or more persons living together who use their income to make joint expenditures. Financial independence is determined by the three major expense categories: housing, food, and other living expenses. To be considered financially independent, at least two of the three major expense categories have to be provided entirely or in part by the respondent.

#### Reference person

The first member mentioned by the respondent when asked to "Start with the name of the person or one of the persons who owns or rents the home." It is with respect to this person that the relationship of other CU members is determined.

#### Income before taxes

The combined income earned by all CU members 14 years old or over during the 12 months preceding the interview. The components of income are: Wage and salary income, business income, farm income, Social Security income and Supplemental Security income, unemployment compensation, workmen's compensation, public assistance, welfare, interest, dividends, pension income, income from roomers or boarders, other rental income, income from regular contributions, other income, and food stamps.

#### Income after taxes

Income before taxes minus personal taxes which includes Federal income taxes, state and local taxes, and other taxes.

#### Complete income reporters

The distinction between complete and incomplete income reporters is based in general on whether the respondent provides values for major sources of income, such as wages and salaries, self-employment income, and Social Security income. Even complete income reporters may not provide a full accounting of all income from all sources. In the current survey, CUs that report across-the-board zero income are categorized as incomplete reporters.

#### Geographic regions

CUs are classified by region according to the address at which they reside during the time of participation in the survey. The regions comprise the following States:

*Northeast* - Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont.

*Midwest* - Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

*South* - Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

*West* - Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

## XIII. APPENDIX 2 -- UNIVERSAL CLASSIFICATION CODE (UCC) TITLES

\*L denotes UCCs that could have negative values. Medical care UCCs have negative values if they are reimbursements. Reduction in loan principal UCCs are all negative for programming convenience. However, they are considered positive expenditures in CE publications.

Underlined UCCs may not be represented in all interview quarters. The quarter in which the deletion (addition) occurs is denoted by a leading superscript directly prior to the UCC code. For example, <sup>A(D)</sup>971(UCC) identifies an addition (deletion) of a given UCC code beginning in Q971.

### A. EXPENDITURE UCCS ON MTAB FILE

- 002120 Other non-health insurance
- 006001 Total amount owed to creditors, 2nd interview
- 006002 Total amount owed to creditors, 5th interview
- \*L 006003 Total amount owed to creditors, 2nd interview, asked first quarter, current year (1997)
- \*L 006004 Total amount owed to creditors, 5th interview, asked first quarter, current year (1997)
- 006005 Total amount owed to creditors, 2nd interview, asked first quarter, current year + 1 (1998)
- 006006 Total amount owed to creditors, 5th interview, asked first quarter, current year + 1 (1998)
- 190901 Food or board, at school and rooming/boarding houses
- 190902 Catered affairs
- 190903 Food and non-alc beverages at restaurants, cafes, fast food places on trips
- 190904 Food and beverages purchased and prepared by CU on trips
- 200900 Alcoholic beverages at restaurants, cafes, bars on trips
- 210110 Rent of dwelling, includes parking fees
- 210210 Lodging away from home on trips
- 210310 Housing for someone at school
- 210901 Ground rent - owned home
- 210902 Ground rent - owned vacation home
- 220111 Fire and extended coverage insurance - owned home
- 220112 Fire and extended coverage insurance - owned vacation home
- 220121 Homeowners insurance - owned home; management fees for property insurance in coops (non-vacation)
- 220122 Same as 220121 - owned vacation home, vacation coops
- 220311 Mortgage interest - owned home; portion of management fees for repayment of loans in coops (non-vacation)
- 220211 Property taxes - owned home; management fees for property taxes in coops (non-vacation)
- 220212 Same as 220211 - owned vacation home, vacation coops
- 220312 Same as 220311 - owned vacation home; vacation coops
- 220313 Interest on home equity loan - owned home
- 220314 Interest on home equity loan - owned vacation home
- 220321 Penalty charges on special or lump-sum mortgage payment - owned home
- 220322 Penalty charges on special or lump-sum mortgage payment - owned vacation home
- 220511 Non-installed wall-to-wall carpeting (original), homeowner
- 220512 Cost of supplies purchased for jobs considered addition, alteration, or new construction incl. dwellings and additions being built, finishing basement or attic, remodeling rooms, landscaping, building outdoor patios, driveways, or permanent swimming pools, and insulation - owned home
- 220513 Same as 220512 - owned vacation home
- 220611 Contractors' labor and material costs, and cost of supplies rented for jobs considered addition, alteration, or new construction (see 220512) - owned home; management fees for capital improvements in condos and coops (non-vacation)
- 220612 Built-in dishwasher, garbage disposal, or range hood for jobs considered addition, alteration,

or new construction - owned home and vacation home

220614 Installed wall to wall carpeting (original), homeowner

220615 Same as 220611 - owned vacation home; vacation condos and coops

220901 Parking at owned home; management fees for parking in condos and coops (non-vacation)

220902 Parking at owned vacation home, vacation condos and coops

230112 Contractors labor and material costs, and cost of supplies rented for inside and outside painting and papering for jobs considered replacement or maintenance/repair - owned home; management fees for similar jobs in condos and coops (non-vacation)

230113 Same as 230112 for plumbing or water heating installations and repairs

230114 Same as 230112 for electrical work and heating or air - conditioning jobs (incl. service contracts)

230115 Same as 230112 for roofing, gutters, or downspouts

230117 Built-in dishwasher, garbage disposal, or range hood for jobs considered replacement or maintenance/repair - renter

230118 Same as 230117 - owned home

230121 Contractors' labor and material costs, and cost of supplies rented for repair or replacement of hard surfaced flooring - renter

230122 Contractors' labor and material costs, and cost of supplies rented for repair or replacement of hard surfaced flooring for jobs considered replacement or maintenance/repair- owned home; management fees for similar jobs in condos and coops (non-vacation)

230123 Same as 230122 - owned vacation home; vacation condos and coops

230131 Installed wall to wall carpeting - renter

230132 Installed wall to wall carpeting (replacement) homeowner

230141 Service contract charges and cost of maintenance or repair for built-in dishwasher, garbage disposal, or range hood - renter

230150 Repair or maintenance services (renter)

230151 Other repair or maintenance services (owned)

230152 Repair and remodeling services (owned vacation)

230142 Same as 230141 - owned home and vacation home

230901 Property management fees - owned home; condos and coops (non-vacation)

230902 Same as 230901 - owned vacation home; vacation condos and coops

240111 Cost of paint, wallpaper, and supplies purchased for inside and outside painting and papering - renter

240112 Same as 240111 - for jobs considered replacement or maintenance/repair - owned home

240113 Same as 240112 - owned vacation home

240121 Cost of equipment purchased for inside and outside painting and papering - renter

240122 Same as 240121 - for jobs considered replacement or maintenance/repair - owned home

240123 Same as 240122 - owned vacation home

240211 Cost of supplies purchased for plastering, paneling, roofing and gutters, siding, windows, screens, doors, awnings; portion of cost of supplies purchased for patios, walks, fences, driveways, swimming pools - renter

240212 Cost of supplies purchased for plastering, paneling, siding, windows, screens, doors, awnings for jobs considered replacement or maintenance/repair; portion of cost of supplies purchased for patios, walks, fences, driveways, swimming pools for jobs considered replacement or maintenance/repair - owned home

240213 Cost of supplies purchased for roofing, gutters, or downspouts for jobs considered replacement or maintenance/repair - owned home

240214 Same as 240212-240213 - owned vacation home

240221 Cost of supplies purchased for masonry, brick or stucco work; portion of cost of supplies purchased for patios, walks, fences, driveways, swimming pools - renter

240222 Same as 240221 for jobs considered replacement or maintenance/repair - owned home

240223 Same as 240222 - owned vacation home

240311 Cost of supplies purchased for plumbing or water heating installations and repairs - renter

240312 Same as 240311 for jobs considered replacement or maintenance/repair - owned home

240313 Same as 240312 - owned vacation home

240321 Cost of supplies purchased for electrical work, heating or air conditioning jobs - renter

240322 Same as 240321 for jobs considered replacement or maintenance/repair - owned home  
 240323 Same as 240322 - owned vacation home  
 250111 Fuel oil - renter  
 250112 Fuel oil - owned home; portion of management fees for utilities in condos and coops (non-vacation)  
 250113 Same as 250112 - owned vacation home; vacation condos and coops  
 250114 Fuel oil - rented vacation property  
 250211 Gas, bottled or tank - renter  
 250212 Gas, bottled or tank - owned home  
 250213 Gas, bottled or tank - owned vacation home  
 250214 Gas, bottled or tank - rented vacation property  
 250221 Coal - renter  
 250222 Coal - owned home  
 250223 Coal - owned vacation home  
 250224 Coal - rented vacation property  
 250901 Wood, kerosene, and other fuels - renter  
 250902 Wood, kerosene, and other fuels - owned home  
 250903 Wood, kerosene, and other fuels - owned vacation home

## **XIV.APPENDIX 3 -- UCC AGGREGATION**

The following shows the UCC aggregation used in the sample program. This information is provided on the AGGregation and LABel files (Section III.F.6. PROCESSING FILES). New and used aircraft purchases are not on the microdata files for confidentiality reasons. They are included in the published CE tables so transportation estimates based on these data may vary slightly from BLS published tables.

### **TOTAL EXPENDITURES**

002120, 190901-220322, 220901-450110, 450210, 450220, 450310, 450313-450410, 450413-450414, 460110, 460901-460902, 470111-600122, 600132, 600141, 600142, 600210-710110, 790220-790600, 790690, 800700-800710, 800801, 800810-800920

    - 270310, 310110-310342, 340610, 340902, 340905, 610130, 620904, 620912

Other equipment and services  
520901, 520904, 520907, 600110-600122, 600132, 600141, 600142, 600210-610120,  
610210-610320, 620330-620420, 620905-620909, 620919-620922

PERSONAL CARE  
640130-650900

READING  
590111-590230, 660310

EDUCATION  
660110-660210, 660900-670210, 670901-670902

TOBACCO AND SMOKING SUPPLIES  
630110-630210

MISCELLANEOUS  
620112, 680110-680902, 710110, 790600, 880210, 900001

CASH CONTRIBUTIONS  
800801, 800810-800860

PERSONAL INSURANCE AND PENSIONS  
002120, 700110, 800910-800940

LIFE AND OTHER PERSONAL INSURANCE  
002120, 700110

RETIREMENT, PENSIONS, SOCIAL SECURITY  
800910-800940

## XV.APPENDIX 4 -- FMLY AND MEMB VARIABLES ORDERED BY START POSITION

This appendix lists FMLY and MEMB variables in the order that they appear on the files. Sections III.F.1. CONSUMER UNIT (CU) CHARACTERISTICS AND INCOME FILE (FMLY) and III.F.2. MEMBER CHARACTERISTICS AND INCOME (MEMB) FILE contain detailed descriptions of these variables arranged on a functional basis.

### A. FMLY FILE

## **XVI. APPENDIX 5 -- PUBLICATIONS AND DATA RELEASES FROM THE CONSUMER EXPENDITURE SURVEY**

A list of publications containing data from the CE program appears below. Bulletins may be purchased from the Chicago regional sales center, from the U.S. Government Printing Office, Washington D.C., 20402, or from National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22161. To place a telephone order with National Technical Information Service, call (703)-487-4650, or for a rush order, call 1(800)-553-NTIS.

Consumer Expenditure Survey, 1996-97, Bulletin (expected release Autumn 1999)	Consumer unit income and expenditures, integrated data from Interview and Diary Surveys, classified by consumer unit characteristics: one way and cross tabulations, relative and aggregate shares. 64 tables.
Consumer Expenditures in 1997, Report 927 (1999)	Consumer unit income and expenditures, integrated data from Diary and Interview Surveys, classified by consumer unit characteristics. 10 tables. Available on request (202)-606-6900.
Consumer Expenditures in 1996, Report 926 (1998)	Consumer unit income and expenditures, integrated data from Diary and Interview Surveys, classified by consumer unit characteristics. 10 tables. Available on request (202)-606-6900.
Consumer Expenditure Survey, 1994-95, Bulletin 2492 (1997)	Consumer unit income and expenditures, integrated data from Interview and Diary Surveys, classified by consumer unit characteristics: one way and cross tabulations, relative and aggregate shares. 64 tables.
Consumer Expenditure Survey, 1992-93, Bulletin 2462 (1995)	Consumer unit income and expenditures, integrated data from Diary and Interview Surveys, classified by consumer unit characteristics: one way and cross tabulations, relative and aggregate shares. 60 tables, 245 pages. Available at the Government Printing Office, stock number 029-001-03214-5, \$15.00.
Consumer Expenditure Survey, 1990-91, Bulletin 2425 (1993)	Consumer unit income and expenditures, integrated data from Diary and Interview Surveys, classified by consumer unit characteristics: one way and cross tabulations, relative and aggregate shares. 60 tables, 256 pages. NTIS Accession No. PB95-190948, \$36.50 for paper copy, \$17.50 for microfiche.
Consumer Expenditure Survey, 1988-89, Bulletin 2383 (1991)	Consumer unit income and expenditures, integrated data from Interview and Diary Surveys, classified by consumer unit characteristics: one way and cross tabulations. 40 tables, 199 pages. NTIS Accession #PB92130061, \$36.00 for paper copy, \$17.50 for microfiche.

Consumer Expenditure Survey, 1987, Bulletin 2354 (1990)	Consumer unit income and expenditures, integrated data from Interview and Diary Surveys, classified by consumer unit characteristics; one way and cross tabulations. 29 tables, 153 pages. NTIS Accession #PB92131622, \$27.00 for paper copy, \$12.50 for microfiche.
---	--

Consumer Expenditure Survey: Integrated Survey Data, 1984-86, Bulletin 2333 (1989)	Consumer unit income and expenditures, integrated data from Interview and Diary Surveys, classified by consumer unit characteristics; one way and cross tabulation. 34 tables, 171 pages. NTIS Accession #PB92131515, \$27.00 for paper copy, \$12.50 for microfiche.
--	---

Consumer Expenditure Interview Survey: Quarterly Data, 1984-1987, Bulletin 2332 (1989)	Consumer unit income and expenditures from the Interview Survey presented by quarter, classified by consumer unit characteristics; region, size, age, quintiles, income before taxes, and tenure tables included. 100 tables, 113 pages. NTIS Accession #PB92131523, \$27.00 for paper copy, \$12.50 for microfiche.
--	--

### **CONSUMER EXPENDITURE SURVEY: QUARTERLY DATA FROM THE INTERVIEW SURVEY**

These quarterly reports present selected expenditure data and include a brief analysis of trends in consumer spending or other topics related to the Consumer Expenditure Survey. Requests for these reports can be made at (202) 606-6900.

### **CONSUMER EXPENDITURE SURVEY DATA ON THE INTERNET**

Commonly-requested CE data tables can be found on-line at <http://stats.bls.gov/csxhome.htm>. Tables of integrated Diary and Interview data from 1984 forward are available under the following headings: Standard tables, Cross-tabulated tables, and Metropolitan Statistical Area tables.

### **FAX ON DEMAND - FAXSTAT**

FAXSTAT contains information and data that may be faxed to users from a touch-tone phone 24 hours a day -- 7 days a week. To receive FAXSTAT transmissions dial (202) 606-6325 and follow the voice prompts. Consumer Expenditure Survey data that are accessible on FAXSTAT are for the most recent year available

### **PUBLIC-USE TAPES**

Public-use tapes for the Diary and Interview Surveys are available for single years from 1984 to 1995, and as two-year tapes for 1982-83 and 1980-81. Seven public-use tapes are available from the 1972-73 survey including Diary Survey – Detailed, Food Quantity, and Integrated Adjusted; Quarterly Interview Survey- Summary, Detailed, Inventory of Consumer Durables, and Quantity of Clothing and Household Textiles. Information about the tapes is available from the BLS national office. (See Section XVII. INQUIRIES, SUGGESTIONS, AND COMMENTS)

## **COMPACT DISKS**

CE microdata on compact disk are available from the Bureau of Labor Statistics for 1972-73, 1984-85, 1990-91, 1992-93, 1994, 1995, 1996, and 1997. The 1984-85 through 1997 releases contain Interview and Diary data, while the 1972-73 CD includes Interview data only. The 1984-85, and the 1990 files (of the 1990-91 CD) include selected EXPN data, while the 1991 files (from the 1990-91 CD) and the 1992-93 CD do not. In addition to the Interview and Diary data, the CDs from 1994-96 include the complete collection of EXPN files. A 1984-94 "multi-year" CD that presents Interview FMLY file data is also available. In addition to the microdata, the CDs also contain the same integrated Diary and Interview tabulated data that are found on the CE data diskettes. (See DISKETTES below.)

## **DISKETTES**

Diskettes containing integrated Diary and Interview survey data on consumer expenditures, income, and characteristics are available for the years 1984 through 1997. The diskettes are for use with IBM-compatible microcomputers with 3 1/2" disk drives. Users may specify either a Lotus 1-2-3 or an ASCII format.

The data on the diskettes are average annual expenditures by American consumers. They are presented in tables classified by 13 standard characteristics: quintiles of income, income class, age, size of consumer unit, composition of consumer unit, number of earners, housing tenure, race, type of area (urban-rural), origin, region, occupation, and education. Also on these diskettes are: data classified by income before taxes, cross-tabulated by age, by family size, or by region; data for selected Metropolitan Statistical Areas; and data for single persons classified by gender, cross-tabulated by age or by income. Expenditure categories in these tables are similar to those shown in the tables of the bulletin publications. For a more detailed description and an order form contact the BLS national office. (See Section XVII. INQUIRIES, SUGGESTIONS, AND COMMENTS)

## **STANDARD ERROR TABLES**

Standard error tables for 1997 Interview and Diary data are available from the BLS national office upon request. These are cell specific and therefore extensive.

## **STATE CODES ON DISKETTE**

State codes from 1980 to 1993 are available on diskette for the Interview Survey. The diskettes contain the variables NEWID and STATE, thus enabling the microdata user to identify the states in which consumer units reside. Caution should be exercised when analysis is done by state, due to the composition of some PSUs. PSUs in some state border areas may not be unique to one state, but may contain CUs from two or more states. (See Section X.D. STATE IDENTIFIER.) Also, because of nondisclosure requirements STATE has been suppressed for some sampled CUs. (See Section IV.A. CU CHARACTERISTICS AND INCOME FILE (FMLY.)) The state data diskettes are free and may be obtained by contacting the BLS national office. (See Section XVII. INQUIRIES, SUGGESTIONS, AND COMMENTS)

## **XVII. INQUIRIES, SUGGESTIONS, AND COMMENTS**

If you have any questions, suggestions, or comments about the survey, the microdata or its documentation, please call (202) 606-6900.

Written suggestions and comments should be forwarded to:

Division of Consumer Expenditure Surveys  
Branch of Information and Analysis  
Bureau of Labor Statistics, Room 3985  
2 Massachusetts Ave. N.E.  
Washington, DC. 20212-0001

The Bureau of Labor Statistics will use these responses in planning future releases of the microdata.
